

Acknowledgements

"In the name of Almighty, the most Beneficent, most Merciful."

"He, who goes in the search of knowledge, walks in the path of GOD", perhaps, is the most appropriate quote to sum up my quest.

It is great privilege for me that I, with a deep sense of gratitude, express my sincere thanks to Prof. Javed Musarrat for invaluable guidance, wise and concrete suggestions, encouragement and methodical approach to perform ELISA based biochemical analytical work. I shall always be highly thankful to Prof. Musarrat for facilitating and providing a congenial atmosphere to work in the institute of Agricultural Microbiology after my routine clinical work in the late evening hours and even in holidays and vacations. Without his guidance, cooperation and help this biochemical research work could not have been a reality.

I express gratitude for Professor Ashraf Malik, Principal J.N.M.C., Aligarh for giving me the idea of pursuing biochemical work with Prof. Javed Musarrat, ex-Chairman and Dean, Institute of Agricultural Microbiology, A.M.U.

Continuing further, I fail to find words to express my heartfelt gratitude for Dr. Najmul Islam, Reader in the Department of Biochemistry for his valuable suggestions, constant help, as well as cooperation to conduct initial biochemical work in his laboratory.

I would like to thank Prof. M. M. H. Siddiqui, Chairman, Department of Anaesthesiology for always acting for my wellbeing and allowing me to avail academic leave for three crucial months to finalize this thesis. His concern for faculty, students, technical staff as well as his constant support shall always inspire me in all future endeavours.

With a deep sense of gratefulness, I convey my sincere thanks to Prof. Shahjahan Bano, who encouraged me to work even harder to complete this
task properly. Her focused attitude and tireless efforts towards academics and departmental work shall always be praiseworthy.

I am really indebted to Mr. Braj Raj Singh, a Ph.D. student in the department of Agricultural Microbiology at the time of conducting the analytical work, for helping me to conduct ELISA based biochemical experiments in Agricultural Microbiology under the supervision of Prof. Javed Musarrat.

I also express my thanks to Prof. R.M. Khan, my colleague, for his suggestions, specifically to incorporate open abdominal hysterectomy as control group.

I also express my thanks to all my colleagues who are working in the department of Anaesthesiology for providing congenial atmosphere. The technical and non technical staff of my department deserves special mention, particularly Mr. Khalid Khan for his managerial work related to this thesis and and Mr. Mohd Shaghil for immediate transport of samples to biochemistry department.

I should fail in my duties and ethics if I do not express my sincere thanks to The Technical staff of the department of Biochemistry Mr. Aslah-uddin for separation of serum and cataloguing the collected samples and Mr. Fazal-ur Rehman and Ms Nishat in the department of Agricultural Microbiology for helping me during this work.

I am also thankful to the technical staff of the Library of J. N. Medical College, faculty of medicine for extensive search of the literature related to this Ph.D. work.

I also thankful to Dr. Nishat Anjum and the technical staff in the department of pathology for providing help related to experimentation.

My deepest gratitude and all prayers go to my family for their unflagging love, encouragement and support throughout my life; this work is simply impossible without them. Words will never be enough to describe the immense help, sacrifices and confidence of my husband, Dr. M. M. Ansari, Reader,
Department of Surgery, who unfalteringly worked day and night for this thesis, and provided me encouragement, constructive advice, outstanding suggestions and support. I was able to complete this task because of his energy and support. The present work bears at every stage the impression of his wise and concrete suggestions, meticulous attention to details, and timely and sincere criticism.

My special thanks goes to my brother, Prof Abid Haleem, Professor, Department of Mechanical Engineering and Management, for providing valuable ideas to improve this work as a whole.

I am unable to express my heartfelt sincere, deep sense of gratitude for my eldest son, Ahmad Ovais, for his wise suggestions, helping me in formatting the whole thesis and providing constant encouragement in odds hours.

I have profound appreciation for my son, Ahmad Omar, for searching and listing general literature and providing graphical representation of analysed data. I will never forget the sacrifice of my youngest son, Ahmad Ozair, to provide me ample time and help to complete this task. May God bless them for their efforts and sacrifices.

I have no words to express my special thanks for my father who encouraged me to pursue Ph.D., my in-laws, specially my mother-in-law who provided me a calm atmosphere to work. I shall always be indebted for them.

I would also like to give thanks to Saira Mehnaz, Lecturer in Community Medicine, who has assisted me in the statistical analysis using SPSS Software. I really appreciate her constant advice. I give my separate thanks to Saima Usmani and Saurabh Dividi for helping me during biochemical ELISA based research work and in calculations of data of on Biochemistry instant software. I would like to thank all people who have helped me in compilation of data, my students, especially Dr Aftab Ahmad, Dr. Mohd Daud, Dr. Yasir Ahmad, Dr. Shyam Bhandari and Dr. Dheeraj Sharma.
My sincere and special thanks to Aligarh Muslim University for providing valuable financial assistance in the form of contributing the funds required to accomplish this task.

Last but not the least I want to acknowledge and thank all who help me directly or indirectly. I beg to be forgiven if any acknowledgement has been omitted due to oversight.

Finally, I thank Almighty, again and again, for His guidance and Benevolence. He helped me to keep going undeterred and made me reach this destination. I pray to Him to keep my faith strong and guide me with His guiding light and bless all the individuals who helped me in completing this juggernaut task in any form. I also pray to Him to give glory and recognition to this great institution, Aligarh Muslim University.

(Dr. Shahla Haleem)
