ACKNOWLEDGEMENT ...	1 - iii
PREFACE ...	iv - v
CONTENTS ...	vi - x
LIST OF TABLES ...	xi - xii
LIST OF FIGURES ...	xiii - xiv
LIST OF PLATES ...	xv
CHAPTER - I INTRODUCTION ...	1 - 23
1.1. The importance of plants and plant products to mankind ...	1
1.2. Trace elements ...	2
1.3. Role of trace elements in plants and animals ...	3
1.4. Accumulation and absorption of trace elements by plants ...	6
1.5. Circulation of mineral salts ...	10
1.5.1. Outward movements of mineral salts from leaves and other lateral organs ...	11
1.6. The food chain from soil to man ...	11
1.7. Uranium as trace elements ...	12
1.8. Effects of radiations on man ...	14
1.9. Scope of the present work ...	16

	<u>Page no.</u>
CHAPTER - II METHODS OF TRACE ANALYSIS ...	24 - 57
2.1. Principles and methods of trace analysis ...	24
2.2. Particle track analysis ...	34
2.2.1. Characteristics of track storing materials ...	34
2.3. Track formation in solids ...	35
2.3.1. Track formation mechanism ...	37
2.3.2. Track formation mechanism : Ion explosion spike or primary ionisation model ...	38
2.3.3. Restrictions in track formation ...	41
2.3.4. Other track formation models ...	41
2.4. Plastic detectors ...	42
2.5. Observation of particle tracks ...	44
2.5.1. Basics of track etching ...	45
2.5.2. Etching conditions ...	46
2.5.3. The different categories of tracks ...	47
2.6. Environmental effects ...	48
2.7. Track counting ...	50
CHAPTER - III EXPERIMENTAL PROCEDURE AND WORKING FORMULA ...	58 - 69
3.1. Collection of samples ...	58
3.2. Preparation of samples ...	58

	<u>Page no.</u>
3.2.1. Preparation of the pellets	... 58
3.2.2. Detector used	... 59
3.3. Irradiation packing	... 59
3.4. Irradiation of samples	... 60
3.5. Etching of irradiated detectors	... 60
3.6. Observation of track densities	... 60
3.7. Determination of uranium concen- tration	... 61
3.8. Derivation of the working formula	... 62
3.9. Experimental error	... 65
3.10. Statistical error	... 66
CHAPTER - IV THE PLANTS SELECTED FOR THE STUDY	... 70 - 77
4.1. Introduction	... 70
4.2. Description of the different categories of plants	... 70
4.2.1. Cereals	... 70
4.2.2. Pulses	... 71
4.2.3. Underground vegetables	... 72
4.2.4. Leafy vegetables	... 73
4.2.5. Fruit vegetables	... 74
4.2.6. Fumitories and masticatories (Smoking and chewing materials)	... 74
CHAPTER - V RESULTS OF URANIUM ESTIMATION	... 78 - 106
5.1. Experimental data	... 78

	<u>Page no.</u>
5.1.A. Uranium contents in cereals, pulses underground vegetables, leafy vege- tables and fruit vegetables	... 78
5.1.A.1. Representation of the data	... 82
5.1.A.2. Variation of uranium contents of various groups of food items	... 83
5.1.B. Uranium estimation in different parts of the plants and soil	... 85
5.1.B.1. Representation of the data	... 85
5.1.B.2. Variation of uranium contents of various plants, parts of the plants and soils	... 92
5.1.C. Uranium estimation in betel leaves and its chewable ingredients	... 96
5.1.C.1. Representation of the data	... 100
5.1.C.2. Variation of uranium contents in betel leaves and its chewable ingredients	... 100
CHAPTER - VI DISCUSSION AND CONCLUDING REMARKS	... 107 - 128
6.1. Discussion	... 107
6.2. Concluding remarks	... 119
6.3. Future perspective	... 121
APPENDICES	
Appendix I Test of significance for the difference of means	... 129

Appendix II Test of significance for the difference of means of more than two samples	...	131
LIST OF PUBLICATIONS OF THE AUTHOR	...	133
