# Table of Contents

**Supervisor’s Certificate** ii  
**Declaration by the Scholar** iii  
**Dedication** iv  
**Acknowledgement** v  
**Preface** vii  
**List of Figures** xiii  
**List of Tables** xvi  
**List of Publications** xvii  

## Chapter 1

**Introduction** 1  
1.1 History and Scope of the Fluid Mechanics . . . . . . . . . . . . . 1  
1.2 Newtonian Fluids and Stokes’ Approximation . . . . . . . . . . . 5  
1.3 Flow through Porous Media . . . . . . . . . . . . . . . . . . . . 10  
1.4 Theory of Non-Newtonian Fluids . . . . . . . . . . . . . . . . . 13  
1.5 The Cell Model Technique and Boundary Conditions . . . . . . . 29
Chapter 2

Stokes Flow of Micropolar Fluid over a Reiner-Rivlin Liquid Sphere

with Non-Zero Spin Condition

2.1 Introduction

2.2 Mathematical Formulation and Solution of the Problem

2.3 Application of Boundary Conditions and Determination of Arbitrary Constants

2.4 Evaluation of Drag on Liquid Sphere

2.5 Some Limiting Cases and Discussion

2.6 Conclusion

Chapter 3

Stokes Flow of Micropolar Fluid over a Deformed Reiner-Rivlin Liquid Sphere

3.1 Introduction

3.2 Mathematical Formulation and Solution of the Problem

3.3 Boundary Conditions and Determination of Arbitrary Constants

3.4 Application to a Liquid Oblate Spheroid

3.5 Evaluation of Drag on Liquid Oblate Spheroid

3.6 Some Limiting Cases and Discussion

3.7 Conclusion
Chapter 4

Slow Viscous Flow Past an Encapsulated Drop of Non-Newtonian Liquid

4.1 Introduction ....................................................... 77
4.2 Mathematical Formulation and Solution of the Problem ........ 81
4.3 Boundary Conditions and Determination of Arbitrary Constants . 85
4.4 Evaluation of Drag on Capsule .................................. 89
4.5 Some Limiting Cases and Discussion .............................. 90
4.6 Conclusion ........................................................... 97

Chapter 5

Stokes Flow over a Reiner-Rivlin Liquid Sphere Embedded in a Saturated Porous Medium

5.1 Introduction ....................................................... 98
5.2 Mathematical Formulation and Solution of the Problem ........ 100
5.3 Boundary Conditions and Determination of Unknowns .......... 104
5.4 Evaluation of Drag on Liquid Sphere .............................. 106
5.5 Some Limiting Cases and Discussion .............................. 107
5.6 Conclusion ........................................................... 117

Chapter 6

Cell Models for Stokes Flow Past an Assemblage of Reiner-Rivlin Liquid Drops

6.1 Introduction ....................................................... 119
6.2 Mathematical Formulation of the Problem ......................... 123
