

Chapter-1 Introduction

1. Introduction	1
1.1 Necessity, research problem and solutions	1
1.1.1 Current concern and status of research	1
1.1.2 Green chemistry concept and management of problems by catalysis	2
1.2 Catalysis	4
1.2.1 History	4
1.2.2 Principle of catalysis	6
1.2.3 Type of catalysts	7
1.2.3.1 Homogeneous catalyst	7
1.2.3.2 Heterogeneous catalyst	7
1.3 Aluminophosphate materials and zeolites.	9
1.3.1 What are aluminophosphate and zeolites?	9
1.3.2 Structure of aluminophosphates and zeolites	10
1.3.3 Isomorphous substitution	14
1.3.4 Acidity of aluminophosphate and chemical behaviour of framework bonding	15
1.4 Synthesis chemistry of aluminophosphate materials	17
1.4.1 Requirement of reagents	
1.4.2 General synthesis procedure of zeotype synthesis	18
1.4.3 Mechanism of crystallization and role of variables	19
1.5 Properties and application of aluminophosphates	21
1.5.1 Shape selectivity	21
1.5.2 Adsorption	21
1.5.3 Catalysis	22
1.5.4 Other uses	23
1.6 Review of literature	24
1.6.1 AIPO-5	24
1.6.2 VPI-5	25
1.6.3 SAPO-34	26
1.6.4 SAPO-5	27
1.6.5 Nomenclature and abbreviations	27

1.6.6 Quinoxaline	27
1.6.7 Imidazole	28
1.6.8 Esterification	29
❖ Proposed Work	31
❖ The proposed work involves	31
❖ Proposed Methodology	31
Chapter-2 Materials and Methods	
2.1 General information about zeotype materials	32
2.1.1 AIPO-5	32
2.1.2 SAPO-5	33
2.1.3 SAPO-34	34
2.1.4 VPI-5	35
2.2 Synthesis aluminophosphate materials	37
2.2.1 AIPO-5	37
2.2.2 SAPO-5	38
2.2.3 SAPO-34	39
2.2.4 VPI-5	40
2.3 Isomorphous substitution	41
2.4 Characterization techniques used in this study	41
2.4.1 X-Ray Crystallography	41
2.4.2 Fourier transform infrared spectroscopy	43
2.4.3 Nuclear Magnetic Resonance Spectroscopy	45
2.4.4 Diffuse Reflectance Spectroscopy (DRS)	47
2.4.5 BET-Surface area analysis	48
2.4.6 Scanning Electron Microscope	50
2.4.7 Energy dispersive spectroscopy (EDS)	52
2.5 Catalytic Study	53
2.5.1 Synthesis procedure of Imidazole	53
2.5.2 Synthesis procedure of Quinoxaline	54
2.5.3 Esterification reaction	54
Chapter-3 Characterization	
3.1 Characterization of zeotype catalysts	56
3.1.1 X-Ray diffraction spectroscopy	56

3.1.2 Scanning electron microscopy (SEM)	60
3.1.3 Energy-dispersive X-Ray spectroscopy (EDS)	63
3.1.4 Diffuse reflectance UV-VIS spectroscopy (DRS)	66
3.1.5 Fourier transform infrared spectroscopy (FTIR)	71
3.1.6 Bet surface area analysis (BET)	74
3.2 Reaction product and characterization thereof	75
3.2.1 ¹ H NMR analysis	75
3.2.1.1 NMR spectrum of Imidazole	75
3.2.2.2 NMR Spectra of Quinoxaline	76
3.2.2.3 NMR of butyl acetate	77
3.2.2 FT-IR analysis	78
3.2.2.1 FTIR of Imidazole	78
3.2.2.2 FTIR of Quinoxaline	79
3.2.2.3 FTIR of Butyl acetate	80
Chapter-4 Results and Discussion	
4.1 Catalyst efficiency and study of synthesis variables	82
4.1.1 Synthesis of Imidazole	82
4.1.1.1 Efficiency of different catalysts	83
4.1.1.2 Effect of reaction time	85
4.1.1.3 Effect of weight of catalyst	89
4.1.1.4 Effect of reaction temperature	93
4.1.1.5 Effect of solvents	97
4.1.1.6 Catalyst recycling	101
4.1.2 Synthesis of Quinoxaline	105
4.1.2.1 Effect of different catalysts	106
4.1.2.2 Effect of reaction time	108
4.1.2.3 Effect of weight of catalyst	111
4.1.2.4 Effect of reaction temperature	115
4.1.1.5 Effect of different solvents	119
4.1.2.6 Effect of catalyst recycling	123
4.1.3 Esterification reaction	126
4.1.3.1 Effect of different catalyst	127
4.1.3.2 Effect of reaction time	128

4.1.3.3 Effect of weight of catalysts	131
4.1.3.4 Effect of temperature	134
4.1.3.5 Effect of catalyst recycling	137
4.2 Discussion	140
Chapter-5 Conclusion	144
Summary & Conclusions	144
References	152
Appendix-I	164
Appendix-II	165
