ACKNOWLEDGEMENTS

No words are adequate to express my deep gratitude to Prof. A.K. Ghosh, Department of Anthropology, North-Eastern Hill University, Shillong, for his suggestion of the problem and help, guidance, supervision and encouragement which contributed greatly to the collection of materials and writing of this thesis.

I am also grateful to Dr. R.K. Pathak, Head, Department of Anthropology, for providing requisite facilities for research work. I would also like to express my gratitude to Dr. Romendra Khongsdier, Department of Anthropology, for his kind help as and when required.

I express my deep gratitude to Dr. Ranjan Gupta, Head, Anthropometry and Human Genetics Unit, Indian Statistical Unit, Calcutta, for providing necessary suggestions from time to time.

I am indebted to Brigadier Dr. R.N. Dutta, Consultant Haematologist at the Assembly of God Church Hospital, Calcutta, Dr. Bani Sengupta of Bhoruka Research Centre, Calcutta, Dr. (Mrs) Purabi Chatterjee of Balananda Brahmachari Hospital, Calcutta, Dr. Debashis Adhikari of Kothari Medical Centre, Calcutta, for according permission to me to meet the patients and interview them in their respective hospitals and also providing requisite data from the hospital records. I am
also grateful to Shri Tapas Sengupta, Secretary Thalassaemia Society of India, for allowing me to meet the patients and collect requisite information from them.

My sincere thanks are due to Sri Sumit Mukherjee and B. Mondal for the keen interest shown by them in the thesis and rendering necessary help as and when required.

Finally, I must express my deep gratitude to the thalassaemia patients as well as their parents who extended their cooperation by giving all the requisite information while carrying out my field study without which it would not have been possible on my part to complete my thesis.

Shillong,
The October, 1997.

(MONDIRA BHONMIK)
