DEDICATION

This thesis is consecrated to the unfailing memory of late Prof. S.K. Maitra, Ph.D. (Lucknow), Professor of Zoology, the University of Burdwan, who had fascinated me to probe into the "Realm of Fish and Fisheries" as I had been his student in my M.Sc. class, and who had so affectionately guided my research leading to the M.Phil. Degree of the University of Burdwan, and who in my eyes, is still within me in his deed, dedication and as a teacher and an erudite.
