ACKNOWLEDGEMENTS

I wish to express my wholehearted gratitude and indebtedness to my revered teachers and supervisors, Prof. Kajal Gupta and Prof. Radhanath Mukhopadhyay of the Department of Botany, The University of Burdwan for their excellent guidance and untiring patience, criticality and encouragements throughout the entire period of research. Without their constant inspiration, the present thesis could never be completed.

I thankfully acknowledge the financial assistance of the University Grant Commission (through Special Assistance Programme) throughout my entire research period. I am also thankful to the University of Burdwan for providing the necessary facilities.

I also express my deep sense of gratitude to Prof. P.S. Basu, Prof. M.A. Choudhury and Prof. A.K. Mukherjee for their valuable suggestions in the field of my research. I also remember the helping attitude of all the teachers and staffs of my department.

I extend my deep indebtedness to Prof. Ambarish Mukherjee and Prof. Balen Nandi who were kind enough to help me with the bacterial and fungal strains. I wish to extend my hearty thanks to Prof. Subrata Laskar, Chemistry Department, Burdwan University who, apart from helping me with different methods on biochemical analysis also provided some chemicals.

I also gratefully acknowledge the kind cooperation of Dr. A. Bandopadhyay, Prof. A.K. Bhattacharya, Dr. M.B. Roy and Dr. T.K. Maity. I am thankful to Prof. P.K. Bhattacharya, The Head of The Department for helping me in arranging the dates for my pre-thesis submission seminar lectures and also for his interest on my research works. In this context, I must acknowledge the valuable suggestions of all the members present on my seminar lectures that helped in improving the thesis.

I must acknowledge the anonymous reviewers of my papers for publication, which not only helped in improving the quality of the manuscripts but also in
incorporating them in the thesis. The cooperation of several authors from the different corners of the world, who took pain in sending their publications on my relevant topic of research, is duly acknowledged.

I am also sincerely thankful to my seniors Dr. S. Choudhury, Dr. S. Ghosh and Dr. P. Ghosh for their precious help. I am also thankful to my friend Gautam for his cooperation throughout my entire research period. Mrs. I. Biswas and Mr. G. Bala also deserve appreciation for helping in many ways.

I am extremely thankful to Mr. N.R. Roy for his photography and U. Ghosh for taking care of my plant materials in the green house. I would also like to express my deep sense of regard to all who helped me in the research laboratory by their untiring efforts.

My heartfelt love goes to my sister, Simpi (Buboon) for her love and encouragements. I sincerely acknowledge the kindness of my well-wishers Mr. Chittaranjan Ghosh (father-in-law) and Mrs. Sandhya Ghosh (mother-in-law), whose constant inspirations and supports helped me in completion of the project. I wish to extend my hearty thanks especially to Priyanka (sister) and also to Mrs. Renu Bala Dutta Roy (Dida), Mrs. Dipali Guha (Baropishi) and Mrs. Sikha Sen (Mashi).

I pay my best regard, gratitude and love to my husband, Mr. Malay Ghosh for his extensive help and robust encouragement throughout my entire research period that helped in the successful completion of the present work which would otherwise be difficult if not impossible.

Above all, my heartfelt inclination is due to my beloved father and mother, whose love, encouragements and constant support inspired me to excel to the possible extent in every steps of my life.
