CHAPTER 4: RESULTS AND DISCUSSION

STUDIES IN AQUEOUS BINARY MIXTURES

4.1 Ethanol + water mixture
   4.1.1 Walden product (\(A_\infty\)) and solvation interactions
   4.1.2 Ion association constant (\(K_A\)) and specific interactions
   4.1.3 Thermodynamic parameter (\(\Delta H^0\))

4.2 1-Ethyl-4-cyanopyridinium iodide in aqueous binary mixtures
    containing aprotic cosolvents
   4.2.1 Walden product (\(A_\infty\)) and solvation interactions
   4.2.2 Ion Association and Ion-solvent Interaction
   4.2.3 Thermodynamic parameter (\(\Delta H^0\))

References

CHAPTER 5: RESULTS AND DISCUSSION

STUDIES IN BINARY NON AQUEOUS MIXTURES

5.1 Ion association and solvation interaction
   5.1.1 Walden product and solvation interaction
   5.1.2 Composition dependence of \(K_A\)

References

CHAPTER 6: SUMMARY AND CONCLUSION

6.1 Introduction
6.2 Conductance studies in mixed binary aqueous solvent
   6.2.1 Walden product (\(A_\infty\)) values and ion solvent interactions
   6.2.2 Ion association, ion solvent and solvent-solvent interactions
   6.2.3 Thermodynamic parameter, (\(\Delta H^0\)) values of ion association

6.3 Conductance studies in mixed binary non aqueous solvents
   6.3.1 Understanding of ion-solvent interactions from Walden
        product (\(A_\infty\)) and limiting ion conductance values
   6.3.2 Ion association and solvation effects

6.4 Conclusion
