ACKNOWLEDGEMENTS

Sm. Manjusri Basu (Dept. of Geography, The University of Burdwan) has supervised this research work sincerely and carefully. I am thankful to her in all respects.

Late Prof. Arabinda Biswas of Viswa Bharati is the perennial and instant source of academic help for this thesis with his ingenuity, original thinking and new ideas. I fail to find words to express my deep gratitude to him. It is a great misfortune that I could not complete this work within his life time.

I have had a valuable academic discussion with Prof. Satyesh Chandra Chakraborty (Indian Inst. of Management, Kolkata). I am also grateful to him for the necessary help to me to finish this research work.

I owe a deep sense of gratitude to Mr. Pranabesh Sanyal (Dept. of Environment, Govt. of West Bengal.), Dr. Sugata Hazra (School of Oceanographic Studies) and Dr.R.N. Goldar of India Meteological Department (IMD) for their useful academic discussions.

Mr. T.K. Chakraborty of IMD also has spent much time on academic discussion with me. I have been benefited in these discussions. Dr. S. Bandopadhyay of Geography Dept., The University of Burdwan has extended help with valuable necessary information and discussions in this research.

I am thankful to Mr. Jagannath Maiti of Ramkrishna Mission School, Sagar, Sitikantha Banerjee of Bakkhali, Mr. Pranab Kar of Digha and Sri Sukumar Bhuinya of Digha.

I have got necessary information from various Government offices. These are Fisheries Dept., Govt. of West Bengal in both Medinipur and Kakdwip, Irrigation and Waterways Dept. in Kakdwip, Relief Dept. in Alipur (S. 24 Parganas) and Medinipur(Midnapur), Tourism Dept. in Kolkata, River Research Institute, Kolkata, Forest Range Office in both Bakkhali and Namkhana, Forest Office in Digha and Hijli, Digha Development Authority in Digha. My sincere thanks to all the officers in these offices.

I am specially thankful to Mr. Devabrata Bandopadhyay, Minister-in-charge in Irrigation & Waterways Dept., Govt. of West Bengal during my investigation in collecting information. I am grateful to all the staff in the National Library, Kolkata for constant source of information and inspiration.

I am thankful to the library staff in the Central Library, the teachers in the Dept. of Geography, all the staff in library and laboratory in the Dept. of Geography, and all the staff in Rajbati, The University of Burdwan.

I owe a deep sense of gratitude and honour to the Registrar and Vice-chancellor of this University for providing me useful official help. I am also grateful to Mr. Tapan Sinha Roy and Pratik Bose for their kind and necessary help.
I am highly thankful to A.K. Singh of Anthropological Survey of India and Ms. Manjari Bhattacharya of Viswa Bharati for giving me constant encouragement and inspiration to finish this work. I am also thankful to Mr. S. Raybardhan of Ekta Ecological Foundation for typing the first phase of research papers. Sampurna Banerjee did an arduous and tedious job to shape the maps and figures in this dissertation. I have a deep sense of gratitude to Ms Krishna Mishra, Ms Bansari Guha and Sm M. Basu to accompany me in my field survey. K. Mishra and Biswajit Meur of Uluberia have helped me in various ways in my research work.

I have a deep sense of gratitude to Sri Sanjoy Pal and Sri Barun Biswas for typing this thesis with great care and responsibility.

Many people in my field survey have helped me with their opinion, valuable discussion and their warm accommodating behaviour. Lastly my parents have been the constant source of encouragement, inspiration and all sorts of help.

I would like to thank all these people for their generosity.

S. Dhara
