ACKNOWLEDGMENT

At the very outset, I am very much grateful to my supervisor, Dr. Joyanti Chuita, for her enormous encouragement and guidance in all throughout my thesis work. She not only taught me the sincerity and motivation of work but also taught me to think about the problem more deeply. As a guide and as a person, I wish to express my deep sense of gratitude and appreciation to her.

Dr. C. B Dwivedi, Assistant Professor of IASST, was always available, in spite of his other works in making me to understand the basic theory of sheath. His simple way of explaining was helpful to me. I acknowledge him for his interest in my works.

I would like to express my sincere thanks to Prof. Yao Xin-zi, Institute of Physics, Chinese Academy of Sciences, Beijing, for his constant help during my work in the Electron Cyclotron Resonance (ECR) Plasma source, in his laboratory.

I wish to offer my heartiest thank to Dr. G. C. Das, Associate Professor, IASST, for his constant encouragement and useful discussions in my thesis works.

Dr. H. Bailung, Mr. A. Buragohain, Mr. B. K. Sarma, and Mr. A. Das were always present to help me whenever I was in trouble in my experiment. Their presence gave me lot of confidence in my works. I always learnt from scientific discussions that I had with them. I sincerely thank them for helping me in various ways.

Dr. Y. Nakamura, ISAS, Japan visiting scientist of the Plasma Physics Division, IASST, helps me a lot in carrying out my experiment. It's a great experience to work with him. I am very much grateful to him for his help and discussions in my work.
I would like to express my sincere thanks to late Dr. P. K. Goswami, former Director, IASST, Dr. K. C. Barua, Director, IASST and Dr. M. K. Kalita, A. O. IASST, for their inspiration as well as help in completing my thesis work at the IASST.

I am grateful to Mr. Niranjan Bhagaboti for his quick proof-reading of the entire thesis and giving important suggestions in order to make the thesis more readable. Thanks also goes to Rajendra and Smita for their encouragement and enormous help in my research works.

My friends Dhruba, Ranjan, Ratul, Partha, Dwipen, Chandan, Moon, Gogoida, Arundhutiba and Lipiba and my brothers Ashimda, Arupda and Bum shared my tensions and joys in my research works and helped me to live in a relaxed atmosphere. They had provided the needed moral support and encouragement throughout the period of my work. I express my heartiest thank to all of them.

My father, who expired during my research work, would have the most happiest person to see my thesis. I lose his helps and encouragement. My mother taught me the concentration, manners and confidence. I am very much grateful to both of them.

I would also like to acknowledge Kabidra Deka, Medhi and Lakhi for their helps during my experiment in the laboratory. Lastly, I am grateful to all who directly or indirectly helped me to complete my thesis work.

Arun Kr. Sarma.
