LIST OF FIGURES

Fig. 1.1. Map of Assam showing the study area [p. 28]

Fig. 2. Trends in different somatotype components among children aged from 3 – 10 years [p. 43]

Fig. 2.1. Distribution of somatotypes among the boys (age 3) [p. 48]

Fig. 2.2. Distribution of somatotypes among the girls (age 3) [p. 48]

Fig. 2.3. Distribution of somatotypes among the boys (age 4) [p. 49]

Fig. 2.4. Distribution of somatotypes among the girls (age 4) [p. 49]

Fig. 2.5. Distribution of somatotypes among the boys (age 5) [p. 50]

Fig. 2.6. Distribution of somatotypes among the girls (age 5) [p. 50]

Fig. 2.7. Distribution of somatotypes among the boys (age 6) [p. 51]

Fig. 2.8. Distribution of somatotypes among the girls (age 6) [p. 51]

Fig. 2.9. Distribution of somatotypes among the boys (age 7) [p. 52]

Fig. 2.10. Distribution of somatotypes among the girls (age 7) [p. 52]

Fig. 2.11. Distribution of somatotypes among the boys (age 8) [p. 53]

Fig. 2.12. Distribution of somatotypes among the girls (age 8) [p. 53]

Fig. 2.13. Distribution of somatotypes among the boys (age 9) [p. 54]

Fig. 2.14. Distribution of somatotypes among the girls (age 9) [p. 54]

Fig. 2.15. Distribution of somatotypes among the boys (age 10) [p. 55]

Fig. 2.16. Distribution of somatotypes among the girls (age 10) [p. 55]
Fig. 2.17. Distribution of somatotypes among the boys (age 11) [p. 56]
Fig. 2.18. Distribution of somatotypes among the boys (age 12) [p. 56]
Fig. 2.19. Distribution of somatotypes among the boys (age 13) [p. 57]
Fig. 2.20. Distribution of somatotypes among the boys (age 14) [p. 57]
Fig. 2.21. Distribution of somatotypes among the boys (age 15) [p. 58]
Fig. 2.22. Distribution of somatotypes among the boys (age 16) [p. 58]
Fig. 2.23. Distribution of somatotypes among the boys (age 17) [p. 59]
Fig. 2.24. Distribution of somatotypes among the boys (age 18) [p. 59]
Fig. 2.25. Distribution of somatotypes among the boys (age 19) [p. 60]
Fig. 2.26. Distribution of somatotypes among the boys (age 20) [p. 60]
Fig. 2.27. Age trends in somatotype components among the boys [p. 65]

Fig. 2.28. Frequency distribution of different categories of somatotypes among children aged from 3 to 10 years (age groups combined) [p. 69]

Fig. 3.1. Distance and velocity curves for height (cm) [p. 77]
Fig. 3.2. Distance and velocity curves for sitting height (cm) [p. 80]
Fig. 3.3. Distance and velocity curves for lower extremity length (cm) [p. 83]
Fig. 3.4. Distance and velocity curves for body weight (kg) [p. 86]
Fig. 3.5. Distance and velocity curves for horizontal head circumference (cm) [p. 89]
Fig. 3.6. Distance and velocity curves for mid-upper-arm circumference (relaxed) [p. 92]
Fig. 3.7. Distance and velocity curves for chest circumference (cm) [p. 95]
Fig. 3.8. Distance and velocity curves for calf circumference (cm) [p. 98]
Fig. 3.9. Distance and velocity curves for humeral diameter (cm) [p. 101]
Fig. 3.10. Distance and velocity curves for femoral diameter (cm) [p. 104]
Fig. 3.11. Distance and velocity curves for triceps skinfold (mm) [p. 108]
Fig. 3.12. Distance and velocity curves for subscapular skinfold (mm) [p. 110]

Fig. 3.13. Distance and velocity curves for suprailiac skinfold (mm) [p. 112]

Fig. 3.14. Distance and velocity curves for supraspinale skinfold (mm) [p. 114]

Fig. 3.15. Distance and velocity curves for calf skinfold (mm) [p. 116]

Fig. 4.1. Height-for-age (p50) of Bengali Muslim boys against NCHS [p. 126]

Fig. 4.2. Weight-for-age (p50) of Bengali Muslim boys against NCHS [p. 126]

Fig. 4.3. Height-for-age (p50) of Bengali Muslim girls against NCHS [p. 127]

Fig. 4.4. Weight-for-age (p50) of Bengali Muslim girls against NCHS [p. 127]
