LIST OF PAPERS

The following papers have been published or accepted for publication.

The following papers have been submitted for publication:

The following papers are being submitted for publication:

1. On the distribution of quotient of independent generalised gamma variables.

2. On the distribution of product of positive powers of maximum values in samples from power-function distributions.

* In collaboration with J. Datta.
3. On the distribution of product of positive powers of ranges in samples from rectangular distributions.

4. On the distribution of quotient of positive powers of ranges in samples from rectangular distributions.

5. On the distribution and moments of radial error.

6. Effect of non-normality on the power function of the two-sample t-test for testing the difference between the means of two populations with a common variance.
