## Contents

### 1. Essentials

1.1 Special Divisibility
1.2 The Joseph measure of Commutativity for a group
1.3 Wreath product
1.4 Boolean rings
1.5 Fuzzy subsets
1.6 Fuzzy subgroups

### 2. Measure of Associativity for an inexact groupoid of degree one.

2.1 Introduction
2.2 Ordered subset of unit interval
2.3 Inexact sets
2.4 Inexact groupoid of degree one
2.5 Measuring Associativity in a Groupoid of Natural Numbers.
2.6 Measure of Associativity for Inexact Groupoid of degree one.

### 3. Inexact Groupoids.

3.1 Inexact sets
3.2 Inexact groupoids
3.3 Klein form of inexact groupoid
3.4 Klein $2^n$ - groups
3.5 Boolean rings.
4. Centre of Inexact Groupoid.

4.1 Sub-inexact groupoids
4.2 Klein form of sub-inexact groupoid
4.3 Centre of inexact groupoid.
4.4 Direct Absolute difference of Klein forms.
4.5 Sub-Klein $2^n$-groups
4.6 Internal direct absolute difference
4.7 Klein $2^n$-group action
4.8 K-morphism

5. Wreath absolute difference of Klein $2^n$-groups

5.1 Introduction
5.2 The Cartesian power of a Klein $2^n$-group
5.3 Wreath absolute difference of Klein $2^n$-groups
5.4 Sub-Wreath absolute difference
5.5 Wreath absolute difference homomorphism

6. Fuzzy Sub-Klein $2^n$-groups

6.1 Fuzzy sub-inexact groupoids
6.2 Fuzzy sub-Klein $2^n$-groups
6.3 Direct absolute difference of fuzzy sub Klein $2^n$-groups
