ACKNOWLEDGEMENT

It is indeed an immense honour for me to express my deep sense of gratitude to my two research guides, Professor Amalesh Dutta, Department of Zoology, Gauhati University and Dr. Sudip Dey, Scientist-in-Charge, Electron Microscope Division, Sophisticated Analytical Instrumentation Facility, North Eastern Hill University, Shillong, under whose dual supervision and valuable guidance, this research work was carried out. The conceptualization of the theme and the topic to that of designing layouts and formats of the theses was suggested by my guides who also took pain to ensure that my motivation did not waver. It would not have been possible on my part to complete the task without their continuous efforts and constant encouragement. Along the way, I had contemplated several times to abandon the research due to ‘information overload’ coupled with stress and fatigue. Their timely intervention and guidance provided a beacon for me to follow in the dark morass of data, details and statistics.

I sincerely thank the Head of Department of Zoology, Gauhati University and other members of his faculty for their active support and encouragement during the tenure of the work.

I am also grateful to Professor B. Myrboh, Head of the Sophisticated Analytical Instrumentation Facility, for unrestricted use of the Electron Microscope Facility and other sophisticated analytical instruments in his research center. In this regard I must mention my sincere appreciation of the efforts of Dr. Debasish Dey, Sri sujoy Dey and Sri Rahul Chakraborty of Sophisticated Analytical Instrumentation Facility (SAIF), whose unmatched computer skills made my data entry work less painful. Smt. B. Dkhar’s assistance in my utilization of the Transmission Electron Microscope has been significant. I also am obliged to all who have assisted me in my sample analysis but who are too numerous to mention.

I express my gratitude to the Principal, G.C. College, Silchar, for his permission to carry out the work in the College premises and also for his quite encouragement. I extend my gratitude to Mrs. Madhabinanda Dey for her relentless support and inspiration throughout the work.

I also extend my thanks to Sri. G.K. Das, Principal, Halflong Govt. College and Sri Kalyan Bhattacharyya of Kalibari Road, Halflong for their support and help in my survey work in N.C. Hills, Assam.

Finally, I express my heartiest gratitude to all my family members especially to my eldest brother Dr. S.P. Bhattacharyya, Ex-Director of Health Services, Govt. of Meghalaya, without whose support this work could not have been completed.

Sankar Prasad Bhattacharyya

(SP. Bhattacharyya)
