CHAPTER I INTRODUCTION 1-22
  Introducing the problem 1
  Review of literature 9
  Aims and objectives 20

CHAPTER II THE AREA AND THE PEOPLE 23-33
  The state of Assam 23
  Guwahati 24
  Study area 29

CHAPTER III MATERIALS AND METHODS 37-40
  Materials 37
  Preliminary investigations 38
  The main study 38
  Duration of the field work 40
  Data processing 40

CHAPTER IV RESULTS 41-131
  Demographic composition 41
  Age-sex composition of population 42
Sex ratio 46
Dependency ratio 49
Classification of households 52
Distribution of population according to age, sex and educational status 52
Distribution of population by age, sex and occupation 55

Fertility 62
Age at menarche 63
Mean age at marriage 65
Percent distribution of women by age at marriage 66
Average number of conception 66
Average specific mean age at first delivery 68
Age specific fertility 70
Live births by broad age groups 70
Age at last delivery 71
Age at menopause 75
Live births in completed family 75
Average number of live births based on educational status of couples 78
Average number of live births based on educational status of wives 79
Average number of live births by employment status of women

Average number of live births according to occupational status of couples

Average number of live births according to occupational status of wives

Family planning and cultural values related to fertility

Knowledge of family planning methods

Source of knowledge of family planning methods

Usage of family planning methods

Reasons for use of family planning methods

Attitude related to sex composition of children

Desired number of children

Value of existing number of children

Causes of having more than desired number of children

Causes of less than desired number of children

Mortality

Sexwisc distribution of infant and child mortality in various age groups of women
