## CONTENT

1. INTRODUCTION :

A. The Concept of Individual Difference.
B. Significance of the Problem in Primary Education.
C. Statement of the Problem under the Present Investigation.
D. Objectives of the Investigation.
E. Scope of the Investigation.
F. Method and Statistical Techniques.
G. Studies in the Field.

2. ANALYSIS :

(i) Range of Individual Differences in Ability Levels of Achievement among the Sampled Children. 20
(ii) Study of the Consistency of Variations in Abilities of Achievements among the Sampled Children. 21

3 ANALYSIS OF THE PROBLEM DIVIDING THE SAMPLED CHILDREN INTO DIFFERENT ABILITY GROUPS :

(i) The Trend of Academic Achievement of the Sampled Children who show Average Abilities in Grade I Test. 38
(ii) The Trend of Academic Achievement of the Sampled Children who show Average Abilities in Grade II Test. 40
(iii) The Trend of Academic Achievement of the Sampled Children who show Average Abilities in Grade III Test. 41
(iv) The Trend of Academic Achievement of the Sampled Children who show Above Average Abilities in Grade I Test. 42
(v) The Trend of Academic Achievement of the Sampled Children who show Above Average Abilities in Grade II Test. 44
(vi) The Trend of Academic Achievement of the Sampled Children who show above Average Abilities in Grade III Test. 46
(vii) The Trend of Academic Achievement of the Sampled Children who show Below Average Abilities in Grade I Test. 47
(viii) The Trend of Academic Achievement of the Sampled Children who show Below Average Abilities in Grade II Test. 49
(ix) The Trend of Academic Achievement of the Sampled Children who show Below Average Abilities in Grade III Test. 51
4. ANALYSIS OF THE NATURE AND EXTENT OF VARIABILITY SHOWN BY THE SAMPLED CHILDREN OF AVERAGE, ABOVE AVERAGE AND BELOW AVERAGE ABILITIES.

(i) Nature and Extent of Variability Shown by the Sampled Children of Average Abilities of Grade I Test. 54
(ii) Nature and Extent of Variability Shown by the Sampled Children of Average Abilities of Grade II Test. 60
(iii) Nature and Extent of Variability Shown by the Sampled Children of Average Abilities of Grade III Test. 65
(iv) Nature and Extent of Variability Shown by the Sampled Children of Above Average Abilities of Grade I Test. 69
(v) Nature and Extent of Variability Shown by the Sampled Children of Above Average Abilities of Grade II Test. 75
(vi) Nature and Extent of Variability Shown by the Sampled Children of Above Average Abilities of Grade III Test. 84
(vii) Nature and Extent of Variability Shown by the Sampled Children of Below Average Abilities of Grade I Test. 94
(viii) Nature and Extent of Variability Shown by the Sampled Children of Below Average Abilities of Grade II Test. 90
(ix) Nature and Extent of Variability Shown by the Sampled Children of Below Average Abilities of Grade III Test. 94

5. Comparison of the trend of achievement and variability shown by the sampled children of average, above average and below average abilities. 100

6. A study of the group difference in achievement maintained by the sampled children in course of their academic progress. 101

7. Children of each ability group maintaining positions in their respective range shown in percentage. 104

8. A study of the effect of sex difference in the academic achievement of primary school children. 110-122

9. A study of the effect of environmental variations in the academic achievement of primary school children. 123-143

10. A study of the impact of teaching by trained teachers in the academic achievement of primary school children. 144-166
11. A study of the impact of school condition in the academic achievement of primary school children. 167-179

12. A study of the effect of multiple class teaching in the academic progress of primary school children 180-195

13. Study of the impact of School and teacher variations on the findings of the population sample analysis. 196-218

14. Study of the effect of individual attention in the academic achievement of primary school children 219-228

15. Study of effect of Age variations in the academic achievement of primary school children 229-236

16. Summary of findings of the investigation 237-248

17. Cause analysis 249-258

18. Conclusion 258-260

19. Some suggestions to the primary school teachers to provide for individual differences among the children. 261-262

20. Recommendation for further researches in the field 263

21. A list of selected bibliography 264
