I sincerely express my deep indebtedness and reverence to my teacher and Research Supervisor, Prof. Md. Basha Mohideen, Rector, S.K.University for suggesting this task and for his invaluable guidance, thought provoking criticism, logical suggestions and constant encouragement through out the progress of this work. Words are inadequate to express my indebtedness to him for taking great pains and effort in the completion of this task. It is a privilege to carry research under his able and conscientious guidance.

I wish to express my thanks to other teaching staff Prof. K. Radhakrishnaiah, Prof. P. Indira and Prof. G.H. Philip for their encouragement.

I am greatly indebted to my elder brother Mr. M. Venu Gopal Reddy, M.C.A. for his constant help in the collection of literature and in the outcome of this dissertation. My special thanks are to my mother Mrs. Chenna Krishnamma and elder sister Mrs. Rajya Lakshmi for their encouragement and support during the course of my M.Phil.

I am thankful to chairman, local fisheries market for the supply of the fishes from different habitats, whenever is necessary.

I express my deep felt gratitude to my brother-in-law Mr. Venkat Reddy and to my friends Satish, Dileep, Sreenivasa Reddy, Jagadish Naik, Nagaraja Reddy and to my senior scholars Sreekanth, Sai Chandrasekhar, Chamundeswari, Venkata Ratnamma.

I also express my thanks to Munna and Haji of the Galaxy Computers along with Afroz and Imroz who helped me in the making of this dissertation.

The basic concept of this work is related to the Major UGC research project on PUFA awarded to Prof. Md. Basha Mohideen.
