ACKNOWLEDGEMENT

At the very outset of this report I have great pleasure in expressing my sincere gratitude to Dr. P. Azad, Associate Professor, IASST and Dr. M. C. Kalita, Reader, Department of Biotechnology, Gauhati University, for their valuable guidance, constant supervision, encouragement and thoughtful suggestions and help throughout the entire period of investigation and preparation of the manuscript.

I also express my sincere thanks to the Director, IASST for allowing me to go ahead with the research work utilizing the laboratory of Life Sciences Division and Library of IASST.

My gratitude is also due to Professor A. Varma, Director, Amity Institute of Herbal and Microbial Studies and Professor G. D. Sharma, Dean, Life Sciences, Assam University, Silchar for their valuable advice and encouragements.

I sincerely acknowledge the support provided by the Department of Biotechnology, Gauhati University; Regional Research Laboratory, Jorhat; Indian Agricultural Research Institute, New Delhi; JNU, New Delhi; ICAR, NEH Complex, Umiam, Meghalaya and Assam Agricultural University, Jorhat to carry out this research work.

I would like to thank all the staff of IASST for their cooperation in carrying out this work.

I would like to thank all of my friends for their company in the tough times and constant encouragements throughout the work.

Above all, I offer my love, admiration and respect to my parents, husband, dada, bow, matu and all the family members for their blessings and encouragement throughout the period of my research work.
