Appendix I: Standard curve prepared from 'Bovine Serum Albumin' for the determination of protein.
Appendix II: Standard curve prepared from ribose to determine the RNA content in tobacco leaves.
Appendix III: Standard curve prepared from 'Calf Thymus DNA' for the determination of DNA content in tobacco leaves.
Appendix IV: Standard curve prepared from known glutamic acid for the determination of glutamic acid content in tobacco leaves.
Appendix V: Standard curve prepared from known threonine for the determination of threonine content in tobacco leaves.
Appendix VI : Standard curve prepared from known serine to determine the serine content of tobacco leaves.
Appendix VII: Standard curve prepared from known proline for the determination of proline content in tobacco leaves.
Appendix VIII: Standard curve prepared from glucose for the determination of total sugar content in tobacco leaves.
