The present thesis is based on the problem suggested by Dr. C.L. Boissya, Professor and Head, Department of Botany, Gauhati University, and the work was carried out under his guidance. I am greatly indebted to Dr. Boissya for his supervision throughout the course of my investigation.

I am also indebted to all my Professors of the Department of Botany, Gauhati University, for their constant encouragement and valuable suggestions during the tenure of the research work.

I express my sincere gratitude to Dr. L. Mannival, Head, Department of Botany, Tocklai Tea Research Station, Jorhat, Assam, and his staff for providing necessary facilities in the Laboratory to carry out a part of my research work. I am also thankful to Ms. Kamruza Zaman Ahmed and Mr. Madhuryya Goswami, Tocklai Laboratory, for extending helpful hands during the experiments.

A word of appreciation is due to Sri R.P. Gohain, Asstt. Director, Forensic Science Laboratory, Guwahati, for his help in conducting few of the biochemical tests.

I wish to place on record my appreciation and thanks to Mrs. Kaveri Borthakur, Research Scholar, Sri R.P. Deori, Research Scholar, Mrs. Kalyani Bhagawati, Research Scholar and Ms. Manjula Choudhury, Research Scholar, G. U., for their constant help and cooperation throughout the period of my research.
I am grateful to the Government of Assam for awarding State Govt. Research Scholarship to enable me to carry out the research work.

And, finally, I express my sincere gratitude to my husband, Dr. S. N. Phukan for his constant cooperation in all spheres of the research work and also for typing out the present thesis.
