Acknowledgement

I had started my research work long ago, just after completion of my M.Sc. But due to some unavoidable circumstances I was compelled to give up my desire. After a gap of several years I completed a minor research project and Dr. K.P. Sarma, then lecturer of Assam Engineering College, supervised the matter. Then, I registered my name as Ph.D. student because of constant encouragement given by respected Dr. Sarma sir.

I am grateful to Dr. (Mrs) B.D. Saikia, former Prof. and head of the Department of Civil Engineering Department (now Principal of A.E.C.) for giving me the permission to do research work in the "Regional Environmental Testing Center" and kindly supervised my work. If I had not met these two personalities, it would not have been possible for me to complete my research works.

I have also received encouragement and assistance from a number of friends, particularly Dr. N. Chetry, Sr. Lecturer, Cotton College and Bhasker Das, in data analysis and atomic absorption spectrophotometer works. I acknowledge my sincere thanks to Professor K.G. Bhattacharya and a few of his students for helping in atomic absorption spectrophotometer works.

I am most grateful to the Principal and G.B. of Arya Vidyapeeth College for granting my lien and further extension for another six months.

I must acknowledge the help of Mr. L. Rabha, bearer of the laboratory, A.E.C. who helped me in sample collection and other laboratory works. I am also thankful to my student "Basu", who helped in typing the manuscript.

My wife "Punu", whose constant support and encouragement made the research work possible. Lastly, both my beloved sons "Sanu" and "Shan" have extended their help and shared my problems at every moment.

Date: 16/8/06
