LIST OF TABLES

Table 1. Amino acid composition of human, bovine, sheep and rat serum albumins. 4

Table 2. Physico-chemical properties of human and bovine serum albumins. 10

Table 3. Extent of internal lysine residues modification and its influence on tryptophan (trp) fluorescence and mean residue ellipticity (MRE) of different serum albumins. 56

Table 4. Gel filtration data of different serum albumins and their modified derivatives obtained on a Seralose-6B column (80 x 1.15cm) at pH 7.4. 75

Table 5. Visible range spectral data of bilirubin bound to different native albumins and their modified derivatives measured in 0.06M sodium phosphate buffer, pH 8.0, ionic strength 0.15. 82
