

TABLE OF CONTENTS

Chapter	Particulars	Page No.
	ABSTRACT	III
	ACKNOWLEDGEMENT	V
	TABLE OF CONTENTS	VI
	LIST OF TABLES	XII
	LIST OF FIGURES	XIII
	LIST OF ABBREVIATIONS	XX
1	INTRODUCTION	1
	1.1 Background	1
	1.2 Objectives of Thesis	4
	1.3 Thesis Outline	5
	List of References	5
2	OVERVIEW OF SMELL SENSOR SYSTEMS	8
	2.1 The sense of smell and its Role in our Life	8
	2.2 Human Sensor System	9
	2.2.1 Sensitivity of Human and Dog Sensing Systems	11
	2.3 Artificial Nose System	12
	2.3.1 How Odor Reception takes place	13
	2.3.2 Smell Sensing	15
	2.4 Development of the Electronic Nose: A Historical View	15
	2.4.1 Origin of Electronic Nose	16
	2.4.2 Electronic nose terminology	17
	2.4.3 Short description of the Electronic Nose	18

concepts and modules

2.5 Components of E-Nose Systems	18
2.6 Different type of sensors	19
2.6.1 Metal Oxide Sensors	19
2.6.2 Conducting Polymer resistive sensors	21
2.6.3 Quartz Crystal Microbalance (QCM)/ Bulk Acoustic Wave (BAW)	22
2.6.4 Surface Acoustic-Wave Sensors (SAW)	23
2.6.5 Field Effect Gas Sensors	23
2.6.6 Optical sensors (Fiber optics)	25
2.6.7 Electrochemical gas sensors	26
2.6.8 Pellistors	26
2.6.9 Chemoresistors	26
2.6.10 Properties of a Good Sensor	27
2.6.11 Comparison among sensor technologies	28
2.7 Data analysis approaches for Electronic Nose systems	31
2.8 Available Commercial E-nose systems	35
2.9 Electronic Nose Applications	38
2.10 Developments in E-nose Systems	41
2.10.1 Hardware Developments	41

2.10.2 Software Developments	46
List of References	50
3 SIMULATION AND DEVELOPMENT OF A SENSOR SYSTEM	60
3.1 Smell Sensor system	60
3.1.1 Sampling Chamber	61
3.1.2 Sensor Array chamber	62
3.1.3 Pattern Classifier	65
3.2 Toxic Chemicals	66
3.2.1 Carbon monoxide	66
3.2.2 Sulfur dioxide	66
3.2.3 Nitrogen oxides	67
3.2.4 Ammonia	67
3.2.5 Copper	67
3.2.6 Lead	67
3.2.7 Polychlorinated biphenyls	68
3.2.8 DDT	68
3.2.9 Nonylphenol	68
3.2.10 Polybrominated diphenyl ethers	68
3.3 The 14 Household Items	69
3.3.1 Distilled Water	69
3.3.2 Lighter fluid	69

3.3.3 Soda Water	69
3.3.4 Perfume Jasmine	69
3.3.5 Orange juice	70
3.3.6 Coffee	70
3.3.7 Rose water	70
3.3.8 Glass cleaner	70
3.3.9 Honey	70
3.3.10 Vinegar	71
3.3.11 Shoe Polish	71
3.3.12 Correction Fluid	71
3.3.13 Fresh Milk	71
3.3.14 Contact Cement	72
3.4 TGS Sensors	72
3.4.1 Operation Principle	72
3.4.2 Sensor Characteristics	74
3.4.2.1 Dependency on partial pressure of oxygen	74
3.4.2.2 Sensitivity to gas	74
3.4.2.3 Sensor response	75
3.4.2.4 Initial action	76
3.4.2.5 Dependency on temperature and humidity	77
3.4.2.6 Long term stability	78
3.4.2.7 Heater voltage dependency	78
3.4.3 Basic measuring circuit	79
3.4.4 Circuit & operating conditions	80

3.5 Smell Finger Print	80
3.5.1 The shape of a signal	81
3.5.2 Features of the Signal	82
3.5.3 Feature extraction using Lorentzian Model	83
3.6 Pattern Recognition Techniques/Classification Techniques	84
3.6.1 Artificial Neural Network (ANNs)	81
3.6.1.1 Radial basis function networks (RBFN)	86
3.6.2 Fuzzy Logic	87
3.6.3 Adaptive neuro fuzzy inference system (ANFIS)	88
3.6.3.1 ANFIS Structure	91
3.6.3.2 Training of Adaptive Neuro-Fuzzy Inference System	92
3.6.3.3 Training Method	93
3.7 Some recent developments in Electronic Nose systems	93
List of References	95
4 RESULTS AND ANALYSIS	100
4.1 Simulation Results for Environment Monitoring	101
4.1.1 Lorentzian Model Responses	101
4.1.2 Smell Finger Prints	107
4.1.3 RBFN Results	110
4.1.4 Output Results from ANFIS	114
4.2 Simulation Results for 14 House Hold Items	116

4.2.1 Lorentzian Model Responses	116
4.2.2 Smell Finger Prints	123
4.2.3 RBFN Results	128
4.2.4 Output Results from ANFIS	134
4.3 Results Analysis	135
4.3.1 Analysis for the application of environmental Monitoring	135
4.3.2 Analysis for the application of Household Items Identification	137
5 CONCLUSIONS AND FUTURE PROSPECTS	140
5.1 Conclusions	140
5.2 Future Prospects	141
APPENDICES	143
A Training Results for Environmental Monitoring	143
B Training Results for Household Items Identification	145
C List of Publications of Work	148
BIBLIOGRAPHY	149
