ACKNOWLEDGEMENT

It is my proud privilege to record here deep sense of gratitude to my respected teacher, Professor P S Ramakrishnan, F N A, F N A Sc, F A Sc, Head, Department of Botany for his constant guidance and supervision during the course of this study. I am also thankful to Professor R R Mishra, F N A Sc, Dean, Faculty of life sciences for extending facilities in the department.

Thanks are also due to the research scholars of Department of Botany, NEHU for their co-operation at every step. Sincere thanks are also due to all my colleagues of Tocklai Experimental Station, Jorhat and friends who extended a helping hand and words of encouragement to my investigation. I am specially indebted to Mr H N Bhagavaty for his help in statistical analysis and Dr M N Deb Choudhury for his help in chemical analysis. The help rendered by Mr B Kotoky and Mr A N S Hussain is also highly appreciated.

I am grateful to the Principal, State Forest Service College-cum-research Institute, Byrnihat, Meghalaya for the facilities extended by him during the period of investigation. Dr N K Jain the then Director, Tocklai Experimental Station is gratefully acknowledged for granting study leave to carry-out the work at Shillong. I thank Mr S K Deb for his sincere effort in typing the manuscript.

Lastly, I acknowledge my wife, Binu for her unfailing inspiration and constant encouragement to make this investigation a success.

S N SHARMA
