# CONTENTS

## CHAPTER I
**GENERAL INTRODUCTION : REVIEW OF LITERATURE**  
1 - 10

## CHAPTER II
**TISSUE CULTURE OF CINNAMOMUM TAMALA LEAF GALL AND NORMAL LEAF: STUDIES ON GROWTH AND CERTAIN ASPECTS OF IAA BIOSYNTHESIS**  
15 - 55

### Materials and Methods
- **Introduction** 15
- **Materials and Methods** 22
  - i) Tissue culture technique 22
    - Effect of growth regulators, antioxidants and other adjuvants on callus initiation 24
    - Effect of growth regulators, mineral nutrients and phenolics on callus tissue growth 25
  - ii) Analytical procedures 26
    - Extraction and quantification of auxin 26
    - Determination of biosynthetic pathways of auxin 28
    - Tryptophan content 30
    - Tryptophan synthetase 31
- **Experimental Results** 33
- **Discussion** 38

## CHAPTER III
**ASSOCIATION OF PEROXIDASE, POLYPHENOL OXIDASE AND IAA-OXIDASE IN IN VIVO AND IN VITRO NORMAL AND GALL TISSUES**  
56 - 119

### Materials and Methods
- **Introduction** 56
- **Materials and Methods** 66
- **Analytical procedures** 66
  - i. In vivo tissues 66
  - Tissue extraction 66
  - A) For enzymes 66
    - a) Buffers 67
    - b) Organic solvents 67
    - c) Different additives in buffers 67
      - i) Chelating agent 67
      - ii) Anionic detergent 68
      - iii) Phenolic scavenger 68
    - i) Concentration 68
    - 2) pH 68
  - B) For estimations of phenols 68
II. In vitro tissues
   Tissue extraction 70
   Enzyme assays and estimations of protein 71
   Polyacrylamide gel electrophoresis 71
   Effect of added phenols on enzyme assays 74

Experimental Results 78
Discussion 79

CHAPTER IV ISOLATION, CHARACTERIZATION AND KINETICS OF AUXIN PROTECTORS 120 - 153
Introduction 120
Materials and Methods 125
   The tissue 125
   Tissue extracts 125
   Destruction of IAA by crude extracts 125
   IAA oxidation mixture 126
   Separation of auxin protectors from gall tissue extracts 126
   Basic assay for protector activity 127
   Kinetics of auxin protectors and mechanism of protector action; extraction and estimation of sulfhydryl compounds 128

Experimental Results 133
Discussion 139

SUMMARY 154 - 157

REFERENCES 158 - 192
