

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
1.	Panchayat wise distribution of households and the sample	53
2.	District and panchayat wise distribution of sample	53
3.	Risk factors of Poverty Index	69
4.	Family details	74
5.	Age and sex-wise details of general population and sample population	76
6.	Educational status	80
7.	Occupation of parents	82
8.	Income and land ownership	84
9.	Housing condition of tribal and nontribal families	86
10.	Unhealthy personal habits prevailing among tribal and nontribal parents	89
11.	Hygiene in the house and its surroundings	91
12.	Practices related to water hygiene	94
13.	Food hygienic practices	95
14.	Personal hygienic practices of preschool children	97
15.	Comparison of tribal and nontribal communities based on their hygienic practices	100
16.	Food habits of tribal and nontribal families	101
17.	Distribution of tribal and nontribal families based on percentage of monthly income on food expenses	103
18.	Distribution of tribal and nontribal families based on monthly food purchasing pattern and food expenditure	104
19.	Comparison of tribal and nontribal communities with respect to food expenditure pattern	107
20.	The sources and mode of purchase of food items	108
21.	Details of cooking practices prevailing among tribal and nontribal communities	110
22.	Breast feeding practices of tribal and nontribal women	113
23.	Bottle feeding practices of tribal and nontribal women	115
24.	Supplementary feeding practices of tribes and nontribes	117

TABLE NO.	TITLE	PAGE NO.
25.	Details of weaning foods given to the tribal and nontribal children	118
26.	Percentage distribution of population based on number of food beliefs possessed	120
27.	Percentage distribution of tribal and nontribal population based on the type of food beliefs and their reasons	121
28.	Intrafamily food allocation practised in tribal and nontribal families.	122
29.	Distribution of Children according to their PQLI	124
30.	Distribution of families based on risk factors of the Poverty Index	125
31.	Poverty index of the tribal and nontribal families	126
32.	Availability and use of health care facilities	127
33.	Health awareness and practices among tribal and nontribal mothers	129
34.	Occurrence of childhood illnesses among the sample excluding last year	131
35.	Sex - wise comparison of sample regarding illnesses occurred through out childhood excluding last year	133
36.	Common childhood illnesses occurred during last one year	135
37.	Sex - wise comparison of childhood illnesses occurred during last one year	137
38.	Frequency of occurrence of common childhood illnesses during last one year	138
39.	Number of episodes of common illnesses during last one year	139
40.	Occurrence of six preventable diseases of childhood	140
41.	Sex - wise comparison of vaccine preventable diseases of childhood	141
42.	Immunization coverage of tribal and nontribal children	142
43.	Vaccine preventable diseases Vs. immunisation coverage	144
44.	Effect of immunization on the occurrence of preventable diseases	145

TABLE NO.	TITLE	PAGE NO.
45.	Incidence of childbirth and death during last year.	147
46.	Mother's awareness on the management of childhood illnesses	148
47.	Age - wise comparison of tribal and nontribal preschoolers based on mean body weight	151
48.	Age and sex- wise comparison of tribal and nontribal preschool children based on the mean body weight	152
49.	Distribution of children according to the nutritional grades based on weight for age classification	154
50.	Comparison of mean weight of preschool children of tribal and nontribal communities with standard weight recommended by NCHS and ICMR	156
51.	Age - wise comparison of tribal and nontribal preschool children based on mean height	157
52.	Age and sex-wise comparison of tribal and nontribal preschool children based on mean height	158
53.	Distribution of children according to the nutritional grades based on height for age classification	160
54.	Comparison of mean height of preschool children of tribal and nontribal communities with standard height recommended by NCHS and ICMR	162
55.	Percentage distribution of children based on wt/ht ²	164
56.	Mean MUAC of preschool children of tribal and nontribal communities	165
57.	Age and Sex - wise comparison of mean MUAC of tribal and nontribal children	166
58.	Age and sex-wise comparison of MUAC of children in tribal and nontribal community with standard values.	168
59.	Distribution of children according to nutritional status based on MUAC	168
60.	Comparison of chest circumference of preschool children	170
61.	Age and Sex - wise comparison of chest circumference of tribal and nontribal children	171
62.	Comparison of head circumference of preschool children	173

TABLE NO.	TITLE	PAGE NO.
63.	Age and Sex - wise comparison of head circumference of tribal and nontribal children	174
64.	Comparison of mean food intake of the tribal and nontribal children with RDA	176
65.	Comparison of tribal and nontribal children based on food consumption	178
66.	Sex - wise comparison of tribal and nontribal children based on food consumption	179
67.	Nutrient intake of tribal and nontribal children in comparison with RDA	182
68.	Comparison of tribal and nontribal children based on nutrient intake	183
69.	Sex - wise comparison of tribal and nontribal children based on nutrient intake	184
70.	Distribution of the sample based on clinical symptoms	186
71.	Percentage of children showing clinical manifestations corresponding to specific nutrients	188
72.	Distribution of children according to the percentage clinical score	190
73.	Comparison of blood haemoglobin levels of tribal and nontribal preschoolers	191
74.	Distribution of children based on Haemoglobin status	193
75.	Distribution of tribal and nontribal preschoolers with respect to worm infestation	194
76.	Comparison of tribal and nontribal preschoolers according to number of worms present	196
77.	Comparison of worm load with Haemoglobin values of tribal and nontribal preschool children	196
78.	Comparison of Nutritional Status Index (NSI) of tribal and nontribal children	198
79.	Sex - wise comparison of Nutritional Status Index (NSI) of tribal and nontribal preschool children	199

TABLE NO.	TITLE	PAGE NO.
80.	ANOVA to compare Nutritional Status Index (NSI) of different age groups of tribal and nontribal preschool children	200
81.	Association of independent socioeconomic variables with the health and nutrition awareness of mothers.	201
82.	Correlation of different anthropometric factors contribute NSI of preschool children	203
83.	Correlation of nutrient intakes and NSI of tribal and nontribal preschool children.	205
84.	Association of specific independent variables with Nutritional Status Index (NSI) of preschool children	206
85.	Correlation of specific independent variables with NSI of tribal and nontribal preschool children	208
86.	Anthropometric parameters and the morbidity pattern of tribal and nontribal preschool children	209
87.	Correlation between nutrient intake and morbidity pattern of tribal and nontribal preschool children	210
88.	Association of selected independent variables and NSI with the morbidity pattern of tribal and nontribal preschool children	211
89.	Correlation of specific independent variables and NSI with the morbidity pattern of children	212
