ACKNOWLEDGEMENT

The author is highly grateful to Dr. I.M. Hazarika, Professor, Department of Geological Sciences, Gauhati University for his constant valuable guidance throughout the course of the work and critical review of the manuscript. I am very much thankful to the Govt. of Nagaland, Education Department, Kohima, for providing me the working facilities at Gauhati University, Guwahati, granting me three years study leave. My thanks goes to all the staff members of Geological Sciences, Gauhati University for their kind help and co-operation during my Laboratory works. Special thanks go to Dr. R.N. Sarmah and Dr. N.N. Pandy of North-Eastern Hill University, Nagaland Campus, Kohima for their valuable advices and help in carrying out my research works. I am equally grateful to the staff members of Geology Department, Kohima Science College, Jotsoma, Nagaland. Thanks also goes to Mr. C.R. Sangtam, S.D.O., Public Health Department, Govt. of Nagaland, for his contribution in my field work. I am also grateful to the staff members of G.S.I., Calcutta (Chemical Division) for their help in chemical analyses of my samples. I deserves my thanks to Mr. Khagen Kalita, who has typed out this thesis. Also, my thanks goes to Mr. Jayanta Jivan Laskar, M.Sc., Research Scholar, Department of Geological Sciences, G.U. rendered me valuable help from time to time in carrying out my research work.

It would not be out of place here to mention the help rendered by my wife Chitralekha and Mrs. Sangtam, who have contributed much in carried out this thesis work.

(B.N. Baishya)
Lecturer,
Department of Geology,
Kohima Science College, Jotsoma,
Nagaland
