Acknowledgements

I could carry out and complete this research work, only with the help, co-operation and goodwill of many people, to whom I will be forever indebted.

Foremost thanks go to my supervisor, Dr. M. Haridas. I sincerely express my deep sense of gratitude and respect to Dr. M. Haridas for his guidance, encouragement and continual support given to me throughout the course of this work. His attitude towards research and to his students is greatly appreciable. He tried to cultivate independent thinking in his students. I respect not only the scientist and teacher in him, but also the human in him. I could experience such a soft approach from few people and it was a great relief for me in many situations.

I am deeply obligated to Dr. Shankar Shashidhar, Director, School of Biosciences. He extended the utmost help academically as well as administratively to ensure smooth progress of this work. I especially thank him for allowing to use the lab at anytime.

I am very much grateful to Dr. Muraleedhara Kurup, Professor, School of Biosciences for the support and encouragement provided for my research. I specially thank Dr. Jayachandran and Dr. Sadasivan (now in Kannur University) for their support, encouragement and valuable suggestions. I extend my thanks to Dr. P.C Ravindran, Dr. M.S. Latha, Dr. Jyothis Mathew and all other faculty members who helped me in one-way or other. The financial support extended by Mahatma Gandhi University is duly acknowledged.

A major part of my work was done at School of Life Sciences, Kannur University. I am deeply obligated to the authorities for providing the facilities.

I am indebted far more than what I can express, to some of my friends. Suprabha. G Nair, Sindhu.R., Sandhya Ramachandran and Elizabeth Samuel were with me from the right beginning of my work. Not only the material help, but also the emotional support provided by them is invaluable. I believe that my greatest achievement during my days at School of Biosciences is my friends. My sincere thank to them. Although Remya was not with me from the beginning, she is also equally important. Thanks to her also.
I am very much indebted to my friend, Mr. Ajithkumar. P.R. Although he had to discontinue his research at its embryonic stage, he helped in many ways that he could. My heart felt thanks to him. I express my sincere thanks to my roommates, Soumya Rani, Jolly Paul and Seba George for the material help and emotional support provided to me.

I would like to acknowledge with thanks the help received from some of the research scholars of School of Biosciences. Dr. Jacob Varghese Biboy was always encouraging and helpful. I express my sincere thanks to him. I thank Dr. Manoj N.K. for his concern about me. Thanks to Mr. Rajeshkumar for all his helps and co-operation. His help in statistical analysis is invaluable. I express my sincere gratitude to Mr. Toji, Dr. P.V. Joseph, Mr. S. Madhavan, Mrs. Indu, and Mrs. Liji who helped me in one-way or other.

My lab mates were always co-operative and helpful. My sincere thanks to Dr. Sreekumar B., Dr. Binoy Jacob, Dr. Sudharshlal, Dr. Arun. A. Rauf, Dr. Jinsu Varghese, Dr. Sunil, Elizabeth Cherian, Sreejith, Sujith, Manju, Siji, Mrs. Annie and Mr. Job. I extend my thanks to Dr. R. Sreekumar, Dr. Sinilal, Dr. Sudheer, Mr. Denny, Mr. Anil, Miss. Julie, Mrs. Gini, Mrs. Linu, Dr. Pankajam and Miss Ambily. I also thank my roommates in the hostel for their co-operation and for adjusting all the inconvenience made to them. I thank Suja, Rajani, Hazeena and Manju.

I am particularly indebted to Mr. Santhosh kumar. A. and Dr. Jaimon Yohannan, Research scholars, School of Pure and Applied Physics for their valuable suggestions and timely help. I find it difficult to convey my gratitude towards Mr. Sathyan, my friend Suprabha’s brother for sending me the blue colored LED from Australia. The most welcoming and helping support given by my cousin, Mr. Shajan in designing the light source for this work is a key factor in the successful completion of this work. My heart felt thanks to him. The suggestions given by Mr. Karunakaran, my neighbour in designing the light source was also valuable.

I express my indebtedness to Dr. Muraleedharan, Prof. and head, Department of oil seeds, TNAU for sending me groundnut seeds in time. I extend my thanks to Dr. Varghese, Head of the department, Department of Biochemistry, School of medical
education for providing the centrifugation facility while our centrifuge was not working. I thank the technical staff of that department, Mr. Mohanan and Miss. Sindhu for their help. The help rendered by Dr. Shaji and Dr. Thomson, RRII, Kottayam in gel doc. analysis is invaluable. My sincere thanks to them. My heartfelt thanks to my cousin, Dr. Benoj Mathew, Department of Botany, St. Peter’s college Kolenchery for helping me in the correction of the manuscript. The staff of central library, M.G University were very co-operative and helpful. I specially thank Mr. Raju and Mr. Murali for their help in collecting the references.

I acknowledge with thanks the technical help provided by the staff of Kannur University; Mr. Vinod, Dr. Arun, Dr. Sreejith, Dr. Vasundhara, Mrs. Rajani (School of Life Science), Mrs. Reena (Department of Management Studies), Miss. Manjula, Mr. Lajeesh, Mr. Wilson, Mr. Sreejith and Mr. Sreekan (Department of Information Technology). I extend my thanks to all other faculty members of School of Life Sciences. My lab mates in Kannur University were very co-operative and helpful. My sincere thanks to Priyanka, Shabeena, Parvathy, Joseph, Geethananth, Indira, Remya..... The help given by some of the non-teaching staff of Kannur University is very appreciable. I thank Mr. Kunjiraman, Mr. Dennis, Mr. Vijayan and the security staff. I express my gratefulness to the inmates of ‘Rag’ for adjusting all the inconvenience made to them due to my occasional stay there and for their co-operation and help. I thank Bringle, Ambily, Suchithra, Uma, Uma devi, Priya, Sabitha, Suraja, Chithra, Soumya..... Once again I thank all the members of Kannur University, Palayad campus who helped me in one-way or other.

I thank the authorities of TBGRI, Palode, Trivandrum; Sreechithrathirunal Institute of Science and technology, Trivandrum; RRII, Kottayam; CMFRI, Cochin; CIFT, Cochin; Cochin University of Science and Technology; Central Library, Kerala Agricultural University; College of Horticulture, Kerala Agricultural University; Veterinary college, Mannuthy, Trissur; KFRI, Peechi, Trissur; Department of Botany, Calicut University; Department of Plant molecular Biology, Delhi University and Jawarlal Nehru University for providing library facilities. The encouraging and informative discussion with Dr. J.P. Khurana, Department of Plant Molecular Biology, Delhi University is duly acknowledged.
I thank Sr. Sabitha, Sr. Thabitha and Mother Superior, Kana Thoma hostel, Kottayam and Dr. Nirmala Devi, University women’s hostel warden for allowing my late arrival in the hostel. Sometimes we get help from unexpected persons and they may not be aware that they are helping us. I have to thank an old man in the building construction group who stayed at School of Biosciences during the construction of upstairs. When I was alone in the department during night his presence gave me the strength and courage. I haven’t spoken to him and I don’t know even his name; but I know that he had a concern about me. My sincere thanks to him.

My sincere thanks to m/s ‘Minitek Computer Center’, Athirampuzha for helping immensely in compiling this thesis. I thank m/s of ‘Baven’s studio’, Kanjikuzhi, Kottayam for all the photographic works. I extend my thanks to m/s ‘Black and White’ Kottayam for designing the cover page.

A word of thanks to my family members for bearing all the inconvenience made to them because of my research. I thank my cousin Mr. Benny Kurian for the encouragement and support provided. I thank Mrs. Thankamani for the support and prayers for me. The ultimate driving force, God, had gracious to me and had blessed me by fruition of this project.

Gincy P. Thottathil
