ACKNOWLEDGEMENTS

I am deeply indebted to Dr. P. Borgohain, Professor of Physics, Cotton College, Gauhati (India) for his masterly and continuous guidance to complete the work. His encouragement and appreciation gave me courage and conviction to wade through all the complexities of research work.

I feel highly privileged and immensely fortunate for having the opportunity to work under the highly learned and expert supervision of Dr. K.D. Krori, Professor of Physics, Cotton College, Gauhati (India). His ceaseless encouragement, parental patronage and matchless ability to generate quest for newer ideas in a learner's mind and, above all, his scholastic contribution to help tread the right course at times of difficulties created an ideal condition for research work and propelled me to advance forward. Also his relentless persuasion, warm appreciation and close monitoring were an inexhaustible source of strength and inspiration for me. I put on record my deep gratitude to him.

I am extremely grateful to Professor R. Huq, former Vice-Principal of Cotton College and Dr. A.K. Goswami, Head of the Department of Physics, Cotton College for their constant encouragement.
