Transliteration

The present research work has followed the transliteration as recommended by the Royal Asiatic Society. Here an effort is made to show the similar pronouncing letters in between Arabic and English or by some symbols while finding no any letter of English against Arabic alphabets as follows:

There are six vowels in Arabic of two categories i.e. long and short having three in each, have been symbolised in the following way:

Long Vowels: ١ = ā ٢ = ū ٣ = ì
Short Vowels: ١ = a ٢ = u ٣ = i

The final ٨ is generally omitted, but somewhere restored and two dipthongs are symbolised as ai and au or ay and aw in this work respectively.
