ACKNOWLEDGEMENT

The author feels immense pleasure in expressing her sense of gratitude and indebtedness to Dr. D.K. Sharma, Department of Zoology, for his supervisions, guidance and constant encouragement throughout the study period which makes possible to prepare this manuscript.

A profound sense of gratitude is expressed to the Prof. and Head, Department of Zoology for his valuable advice and allowing me to do this piece of work in the Zoology Department, Gauhati University. The author also avails the opportunity to acknowledge the Director, Department of Sericulture, Govt. of Assam for providing financial assistance to complete the work smoothly.

Sincere thanks are also due to the Director, Dr. P. Goswami, IASST, Dr. M.K. Kalita, Dr. J.N. Talukdar and all the colleagues and friends for their creative suggestions.

The author thankfully acknowledge Dr. Sudip Dey and all the members of RSIC, Shillong for their kind assistance and suggestions in doing some laboratory works.

A tender note of thanks is expressed to all the employees and staff members of the Basic Muga Seed Farm, Khanapara for their helping hands during the period of experimentation.
Sincere thanks are also due to Mrs. Lipi Benerjee and Mr. Niranjan Bhagawati for their core helps in making the statistical analysis of the data. Mr. Ajeet K. Goswami, Mr. Sirajuddin Talukdar, Mr. Subrata Goswami and Mr. Kandarpa Baishya need special mention for their constant help leading to the completion of this work.

Sri Prabodh Kr. Deka, IASST deserves special call for the efficient typing of this thesis.

Last but not least thanks are due to all the members of our family, specially to our little daughter 'Beli', without whose support this venture would not have been possible.

All may not have been mentioned, but none is forgotten.

Date: 11-10-93.
