# CONTENTS

## CHAPTER I INTRODUCTION

1.1 Diversity of Chemicals of Economic Importance  
1.1.1 Medicinal plants  
1.1.2 Agrochemical  
1.2 Plant Tissue Culture as Source of Secondary Metabolites  
1.2.1 Products from plant tissue culture  
1.2.2 Novel compounds from cell culture  
1.3 Biotransformation  
1.4 Major Strategies for the Improvement of Secondary Metabolite Production  
1.4.1 Hairy root culture  
1.4.2 Elicitation  
1.4.3 Immobilized culture  
1.4.4 Genetic engineering  
1.5 Studies on Basic Metabolism  
1.6 Objectives of Present Work  
1.6.1 Biogenesis of plumbagin  
1.6.2 In vitro studies on P. rosea  
References  

## CHAPTER II TISSUE CULTURE STUDIES ON PLUMBAGO ROSEA, LINN.

1.1 Introduction  
2.2 Materials and Methods  
2.3 Results and Discussion  
References  

## CHAPTER III PERMEABILIZATION

3.1 Introduction  
3.2 Materials and Methods  
3.3 Results  
3.4 Discussion  
References
CHAPTER IV  ELICITATION

4.1. Introduction 115
4.2. Materials and Methods 123
4.3. Results 126
4.4. Discussion 162
References 167

CHAPTER V  SYNERGISTIC EFFECT OF IMMOBILIZATION, PERMEABILIZATION AND IN SITU PRODUCT RECOVERY

5.1. Introduction 174
5.2. Materials and Methods 181
5.3. Results and Discussion 183
References 192

CHAPTER VI  SECONDARY METABOLITES FROM CALLUS CULTURE OF P. ROSEA, LINN.

6.1. Introduction 196
6.2. Experimental 196
References 202

SUMMARY 203
