ACKNOWLEDGEMENT

This work has been possible only with various kinds of help received from a host of well-wishers, friends and acquaintance, and I shall certainly be failing in my duties if I do not place on record of gratitude to at least some of them.

My foremost and heaviest debt is to Dr. P.J. Das, M.Sc., Ph.D. but for whose reassuring encouragement this project would possibly not have been started and without whose inspiring guidance, it would certainly not have been completed.

Secondly, I'm very much thankful to the Guwahati Refinery Management for being kind enough to accord permission to enable me to undertake this research project.

Next, I must record my sincere thanks to the HOD, Chemistry, Gauhati University, who was kind enough to permit me to utilize laboratory facilities.

My thanks are also due to the authorities and staff of Regional Research Laboratory, Jorhat, for extending library facilities and Regional sophisticated Instrumentation Centre, for providing the spectra of the compounds.

Finally, the author may be allowed to close on a personal note. He shall be failing in duty if he does not convey his heartfelt thanks to all his colleagues for their cheerful encouragement, valuable suggestions and friendly co-operation and in particular to Mr. T. Gogoi of Q.C. Laboratory, Guwahati Refinery.

Lastly, I must admit that I owe a special debt of gratitude to all the members of my family, who have, throughout the period I was engaged in it, cheerfully borne privations and inconvenience resulting from my almost constant preoccupation and been a silent and sure source of strength and confidence whenever my patience and inner will seemed to be running out.

Susanta Roy
