ACKNOWLEDGEMENT

I would like to avail this opportunity to express that I am intellectually indebted to my supervisor, Dr. Gautam Choudhury, Assistant Professor, Mathematical Science division, IASST, Guwahati. He is the one, who not only supervised me in my course of research investigations but also stimulated my interest in this subject area through his research works. He inspired me through his dynamic personality, concern and kindness. I feel myself to be very fortunate and highly privileged to have worked under his guidance. He is truly a friend, philosopher and guide to me. My Ph.D. work would not have been possible without the help and feedback of him. His comments and suggestions significantly helped in improving the quality of the thesis. I shall ever remain grateful to him for his affectionate care, help and encouragement throughout my life.

I would like to thank the Department of Atomic Energy (DAE), Government of India, Mumbai, for the award of JRF and SRF, which enabled me to devote my whole time in research investigation throughout the project.

I express my gratitude to all the faculty members of Mathematical Sciences Division, IASST, for their support and continuous help for providing necessary facilities for smooth running of the project. I also thank the authority and employees of IASST for their help and assistance in carrying my research work smoothly.

I would like to express my gratitude to Late Prof. Haren Choudhury (Retd.), Department of Statistics, Guwahati University, for his encouragement during the period of research investigation. I also express my deep sense of gratitude to my beloved faculties of the Department of Statistics, Gauhati University, for their suggestion and cooperation.
I am also grateful to the Librarians and staffs of the Central Library of IASST and the K. K. Handique Library of Gauhati University for offering me a good collection of books which helps me in collecting study material during my course of research investigation.

I am also indebted especially to my parents, Sri Kaushik Ranjan Paul and Smt. Shefali Paul for their motivation, unwavering support and encouragement is a daily blessing for me and my love and respect for them is boundless. Their role in my life will remain a source of enduring inspiration to me throughout my life.

I would particularly like to record my sincere thanks to my brother Mr. Kaustav Paul, elder sister Smt. Mousumi Paul, brother in law Mr. Sujit Paul and nephew Master Saikat Paul. I would have never accomplished this work unless the constant support and encouragements of them.

I wish to thank my friend and colleague Mr. Kandarpa Deka of IASST, for his constant help and support during the period of thesis preparation. I also wish to thank all my friends and colleagues from IASST who helped me in the preparation and inspired me during the period of investigation.

My very special thanks are due to my in laws Mr. Paritosh Ch. Rakshit and Mrs. Krishna Rakshit and my sister in law Smt. Sutapa Rakshit for their support and help.

Finally, last but not least, my greatest acknowledgement must be reserved for my husband Mr. Sandeep Rakshit for his full co-operation, constant support and encouragement. I thank him for his care and concern.
The effort involved in preparing and writing the thesis would not have been possible without the help and support of my husband and my little daughter Enakshi. My daughter is my source of inspiration and I would have never accomplished this work unless her silent support and patience during the period of thesis preparation.
