CONTENTS

Acknowledgment : Pages
Abstract: 1-9
Chapter 1: Basic concepts and fundamental results 10-38
Chapter 2: Periodic points and their stability on a one-dimensional chaotic systems 39-53
Chapter 3: Determination of Lyapunov exponents and study of time-series graphs on nonlinear chaotic systems 54-66
Chapter 4: Control of unstable periodic orbits coexisted with the strange attractor 67-77
Chapter 5: Dynamical behaviour of two dimensional nonlinear maps 78-94
Chapter 6: Attractor’s dimensions of two dimensional nonlinear maps 95-119
Chapter 7: Control of chaos in two dimensional non-linear maps 120-133
Chapter 8: Motivation and scope of future research work. 134-142
Bibliography 143-161
