## LIST OF TABLES

1. **Average temperature, rainfall and humidity in Gauhati**...
   following page 16

1A. **Fungal organisms isolated from different foodstuffs in storage condition**...
   following page 17

2. **Fungal organisms isolated from wheat flour and its products (Bread) in storage**...
   following page 19

3. **Aerospora isolated from Rice godowns and bakeries of Gauhati in the year 1977**...
   following page 20

4. **Daily growth rate of fungi on specific host substrates (rice powder, wheat flour and corn flour)**...
   following page 22

5. **Effect of moisture content on the spoilage of foodstuff**...
   following page 25

6. **Daily growth of fungi: hand-threshed and mill-threshed rice**...
   on page 28

7. **Studies on the effect of Relative humidity on the spoilage of foodstuff**...
   following page 29

8. **Studies of fungal flora in storage condition of different foodstuffs in controlled humidities**...
   following page 29

9. **Effect of crude extract of *A. flavus* on pollen germination**...
   on page 33

10. **Percentage of germination of seeds in different fungal extracts**...
    on page 34

11. **Effect of mycotoxins on seedlings**...
    on page 35

12. **Effect of mycotoxins on the embryonated eggs**...
    on page 37

13. **Effect of mycotoxins on chick**...
    on page 38

14. **Selected physical and chemical data on aflatoxin (Wogan, 1969)**...
    on page 40

15. **Effect of feeding chicken with aflatoxin B and G on their weight and mortality**...
    on page 44

16. **Effect of feeding mice with aflatoxin on the weight and mortality**...
    on page 45

17. **Results of the sensitivity of *Staph. aureus* and *E. coli* towards different concentrations of aflatoxin**...
    on page 47

18. **Effects of feeding albino rats with mixed aflatoxin**...
    following page 71
