Chapter-I INTRODUCTION 1-7
  1.1 The Problem
  1.2 Heavy Metals
  1.3 Objectives

Chapter-II STATUS AND BIOLOGY OF THE SPECIES 8-18
  2.1 Greater Adjutant Stork (Leptoptilos dubius)
  2.2 Lesser Adjutant Stork (Leptoptilos javanicus)
  Reference

Chapter-III METHODOLOGY 19-34
  3.1 Selection of sites
    3.1.1 Study area I-Sivasagar
    3.1.2 Study area II-Nagaon
  3.2 Collection sites
    3.2.1 Location of collection site for soil and water samples
    3.2.2 Location of collection for eggshell samples
      3.2.2.1 Sivasagar area
      3.2.2.2 Nagaon area
  3.3 Sample collections
    3.3.1 Collection of soil samples
    3.3.2 Collection of water samples
3.3.3 Collection of eggshell sample

3.4. Sample analysis
3.4.1 Elemental analysis
   3.4.1.1 Soil analysis
   3.4.1.2 Water analysis
3.4.2 Scanning electron microscopic study
3.4.3 Energy dispersive - ray microanalysis
3.4.4 Analysis of organic components of eggshell matrix

Chapter IV RESULTS AND DISCUSSION 35-88

4.1 Ecological setup of the birds
   4.1.1 Nesting pattern
   4.1.2 Breeding time
   4.1.3 Food and foraging pattern

4.2 Data on elemental analysis
   4.2.1 Sivasagar area
      4.2.1.1 Data on soil analysis
      4.2.1.2 Data on water analysis
      4.2.1.3 Data on eggshell analysis
   4.2.2 Nagaon area
      4.2.2.1 Data on soil analysis
      4.2.2.2 Data on water analysis
      4.2.2.3 Data on eggshell analysis

4.3 Description of scanning electron micrograph

4.4 Structural features of eggshell
   4.4.1 Introduction
   4.4.2 L.chubius
      4.4.2.1 Sivasagar area
      4.4.2.2 Nagaon area
4.4.3  *L. javanicus*  

4.4.3.1 Sivasagar area  
4.4.3.2 Nagaon area  

4.5  Network of interlacing fibres  

4.6  Organic matrix of the eggshell  

4.7  Elemental composition eggshell crystals  

4.7.1  *L. dubius*  

4.7.1.1 Sivasagar area  
4.7.1.2 Nagaon area  

4.7.2  *L. javanicus*  

4.7.2.1 Sivasagar area  
4.7.2.2 Nagaon area  

4.8  General discussion  

**Chapter V SUMMARY**  
89-95  

**References**
