Abstract

1. Chapter-I Introduction
1.1 Background
1.2 Magnetic Nanoparticles (MNPs)
1.3 Synthesis of Magnetic Nanoparticles (MNPs)
1.4 Magnetic properties of Magnetic Materials
1.5 Ferrite Magnetic Nanoparticles, their Functionalization and Catalytic Application
1.6 Aim and Scope of the Work
1.7 References

2. Chapter-II Materials, Methods and Instrumental Techniques for Physico-Chemical Studies

2.1 Section-I Materials and Methods
2.1.1 Materials
2.1.2 Methods of Magnetic Nanoparticle Synthesis

2.2 Section-II Instrumental Techniques for Physico-Chemical Studies

2.2.1 Scanning Electron Microscopy (SEM)
2.2.2 Transmission Electron Microscopy (TEM)
2.2.3 X-ray Diffraction (XRD)
2.2.4 Vibrating Sample Magnetometer
2.2.5 Fourier Transform Infrared and Raman Spectroscopy
2.2.6 Elemental analysis
2.2.7 Surface area analysis
2.2.8 Other Spectroscopic measurement

3. Chapter-III Synthesis of CoFe₂O₄ Magnetic Nanoparticles and their use as catalyst for Organic Transformations

3.1 Section-I 3.1.1 Synthesis and Characterization of CoFe₂O₄ Magnetic Nanoparticles
3.1.1 Introduction
3.1.2 Review of Literature
3.1.3 Present work (Objective)
CONTENTS

3.2 Section-II CoFe$_2$O$_4$ nanocrystals as quasi-homogeneous catalyst for Knoevenagel condensation

3.2.1 Introduction
3.2.2 Review of Literature
3.2.3 Present work (Objective)
3.2.4 Result and Discussion
3.2.5 Conclusion
3.2.6 Experimental Section
3.2.6 References

3.3 Section III 3.3 Use of CoFe$_2$O$_4$ magnetic nanoparticles (MNPs) as catalyst for Aldol type reactions

Part A Aldol condensation by CoFe$_2$O$_4$ MNPs
3.3.1.1 Introduction
3.3.1.2 Review of Literature
3.3.1.3 Present work (Objective)
3.3.1.4 Result and Discussion
3.3.1.5 Conclusion
3.3.1.6 Experimental Section

Part B Nitroaldol reaction by CoFe$_2$O$_4$ MNPs
3.3.2.1 Introduction
3.3.2.2 Review of Literature
3.3.2.3 Present work (Objective)
3.3.2.4 Result and Discussion
3.3.2.5 Conclusion
3.3.2.6 Experimental Section
3.3.1 References

3.4 Section IV Catalytic use of CoFe$_2$O$_4$ MNPs for acetylation of alcohols and amines and Boc-protection of amines
3.4.1 Introduction
3.4.2 Review of Literature
CONTENTS

4. Chapter-IV Palladium incorporated CoFe₂O₄ Magnetic Nanoparticles in Organic Transformations

4.1 Section I Synthesis and Characterization of Palladium incorporated CoFe₂O₄ MNPs
4.1.1 Introduction
4.1.2 Review of Literature
4.1.3 Present work (Objective)
4.1.4 Result and Discussion
4.1.5 Conclusion

4.2 Section II 4.2 Palladium incorporated CoFe₂O₄ nanoparticles: a facile magnetic catalyst for Suzuki reactions under mild conditions
4.2.1 Introduction
4.2.2 Review of Literature
4.2.3 Present work (Objective)
4.2.4 Result and Discussion
4.2.5 Conclusions
4.2.6 Experimental Section

4.3 Section III Synthesis of Spirocycles using Palladium incorporated CoFe₂O₄ nanoparticles
4.3.1 Introduction
4.3.2 Review of Literature
4.3.3 Present work (Objective)
4.3.4 Result and Discussion
4.3.5 Conclusions
4.3.6 Experimental Section

4.4 References
CONTENTS

5. Chapter-V Catalytic application of ferrite magnetic nanoparticles in Photocatalysis

5.0 General Introduction 236

5.1 Section I Use of a novel CoFe₂O₄-Cr₂O₃-SiO₂ fluorescent magnetic nanocomposite for photocatalytic degradation of Methylene blue

5.1.1 Introduction 239
5.1.2 Review of Literature 240
5.1.3 Present work (Objective) 241
5.1.4 Result and Discussion 242
5.1.5 Conclusions 243
5.1.6 Experimental Section 244

5.2 Section II Use of CoFe₂O₄-ZnS nanocomposites in photocatalytic degradation of Methyl orange

5.2.1 Introduction 245
5.2.2 Review of Literature 246
5.2.3 Present work (Objective) 247
5.2.4 Result and Discussion 248
5.2.5 Conclusions 249
5.2.6 Experimental Section 250
5.1 References 251

Concluding Remark 252
