Chapter 1. **INTRODUCTION (1-5)**

Chapter 2. **SYSTEMATICS OF THE SPECIES (6-19)**

2.1. Profile of the Sub-family: Schizothoracinae

2.2. Characteristics of the Genus: *Schizothorax* Heckel

2.3. Taxonomic account of *Schizothorax richardsonii* (Gray, 1832)

2.4. Distribution trend of *Schizothorax richardsonii* (Gray, 1832)

Chapter 3. **CHARACTERISTICS OF THE HABITAT (20-24)**

3.1. Fluvial dynamics

3.2. Abiotic factors

3.3. Biotic communities

Chapter 4. **ETHOLOGICAL FEATURES (25-29)**

4.1. Locomotive deportment

4.2. Ingestive behaviour

4.3. Procreatic demeanour
Chapter 5. **BIONOMICS PROFILE (30 - 37)**

5.1. Food spectra
5.2. Lineament of feeding
5.3. Relative gut length
5.4. Gill raker characteristics
5.5. Index of pre-ponderance
5.6. Hepato-somatic index

Chapter 6. **WEIGHT-LENGTH RELATIONSHIP (38 - 42)**

6.1. W – L relationship in mixed population
6.2. W – L relationship in male population
6.3. W – L relationship in female population
6.4. Condition coefficient.

Chapter 7. **REPRODUCTIVE BIOLOGY (43 - 61)**

7.1. Sexual dimorphism and sex ratio
7.2. Size at first maturity
7.3. Maturity cycle of the gonad
7.4. Fecundity
7.5. Gonado-somatic index
7.6. Breeding season and periodicity
7.7. Spawning habitat and trend
7.8. Breeding technique
Chapter 8. **EMBRYONIC AND LARVAL DEVELOPMENT (62 - 66)**

8.1. Embryonic phase
8.2. Larval phase

Chapter 9. **FISH NOSOLOGY AND RESTRAINT (67-75)**

9.1. Zymosis types and traits
9.2. Prophylactic and control measures.

Chapter 10. **DISCUSSION (76 - 95)**

- SUMMARY (96 - 100)
- REFERENCES (101 - 124)
