ACKNOWLEDGEMENT

For any devotional and painstaking research work in mathematics, particularly in India, three types of energy sources are recognised. These are the goodwill of spiritual 'gurus', inspiration of the family and then the kindness of the mathematical community. Naturally I procure all these invaluable blessings. I would like to thank everyone concerned with these sources although it is hardly possible to pay for its return.

This work is the result of my association with my research guide Dr. T.K.Dutta, Reader, Department of Mathematics G.U. I acknowledge my thanks and gratitudes to him for his keen interest with continuing confidence in me and for his patronage, inspiring guidance with constant encouragement.

I must express my sense of gratitudes to my wife Dr. Meena Goswami and my love to my children for their all round help and particularly pushing me incessantly with a "go on" and a "not yet over" attitude inspite of my serious and persistent eye troubles hindering the work for years together.

I take the privilege to express my heartfelt appreciation for my father, mother and my 'Gurudev' for their blessings and their remaining as abiding sources of inspiration.

My sense of gratitudes with regards go to Dr.B.P. Chetiya, Professor and Head of the Mathematics Deptt. G.U. along with all his colleagues for providing departmental
facilities and academic assistance.

I owe to different institutes for providing the benefit of access to their departmental laurels and to their library facilities. These includes the Gauhati University, the Ramanujan Institute of Advanced Mathematics; the Madurai Kamaraj University; the Central University of Hyderabad; the TIFR, Bombay; the Institute of Mathematics, Polish Academy of Sciences, Warsaw and etc.

Thanks with appreciation are also extended to Dr. J. Lukes and his colleagues at the Charles University, Prague; Dr. W. Wilczynski and Dr. Ms. E. Lazarow at University of Lodz who enlightened me with latest sources of literature and exchange with personal contact.

My thanks are also due to the UGC for awarding me a fellowship and other financial assistances during the research period.

I place on record my thanks to Miss Gita Deka with the 'Century Photostat' for skillful typing and script preparation, and to Mr. Surya Das, G.U. for his technical helps.
