ACKNOWLEDGEMENT

I take this opportunity to express my gratitude to Dr. Monirul Hussain for his constant encouragement, guidance and provocation for thinking and rethinking. Indeed this study would not have taken shape without his suggestions and critical scrutiny. Besides, he has given me full autonomy in conducting my study. I must express my gratitude to Dr. Amalendy Guha, Prof. Niru Hazarika, Late P.C. Goswami, and Dr. B.P. Maithani for their valuable suggestions and encouragement. However, any lapses of judgement in the dissertation are entirely mine.

I am grateful to Akhil Ranjan Dutta, Muzibur Rahman and my many other friends of different villages who have helped me in my field study. I must also acknowledge the help provided by Dr. K. Haloi, Dr. S. Chatterjee and Sri B. Kalita of NIRD, N E R centre, Guwahati. My thanks are also due to the library staff of NIRD, Hyderabad and the University of Gauhati, Guwahati.

I must acknowledge the constant inspiration and help of Meghali, Anjan, Aparajita, Nayan, Pijush and Arun. To thank them would be too formal. Finally, my thanks also go to Dr. G.R. Mohanty, Sri A. Boro and Sri S. Chakrabarty of Dimoria College, Khetri and my friend Kaustav Sharma for their editorial help.
