ACKNOWLEDGEMENT

I am greatly indebted to Prof. P. C. Goswami (I.F.C.I. Chair Professor, Department of Commerce, Gauhati University), under whose supervision the study was done. It was a privilege and a great advantage to have free access to the wealth of his wisdom and experience.

The University Grants Commission had advanced a grant for the study under its scheme of financial assistance for 'Minor Research Projects'. Without this grant, completing the study would have been much more difficult.

In carrying out field surveys in connection with the study, I received support and assistance from a large number of people. The Agricultural Extension Officers and the Village Level Extension Workers of the four circles in which the field work was done, gave full co-operation not only in providing background information but also in the process of selection of the sample. The sample farmers interviewed were invariably very cordial and always patient enough to answer all the questions asked. My student friends Sri Narayan Goswami, Sri Manabendra Medhi, Sri Hema Prasad Bordoloi, Sri Tarun Bora, Sri Dipankar Gogol and my ex-colleague Sri Ujjwal Bhuyan helped me in data collection in the field surveys. Sri Narayan Goswami also gave a useful hand in processing these data. I am thankful to all these people for their kind and valuable help.

A good deal of library work for this study had to be done outside the K. K. Handique Library of Gauhati University. I am grateful to the library authorities of the
Ratan Tata Library of the Delhi School of Economics (Delhi),
the Assam Agricultural University Library (Jorhat) and the
Documentation Centre of the Indian Council of Social Science
Research (New Delhi) for kindly allowing me to use their
library facilities freely.

The two maps incorporated in this thesis have been
drawn with great care by my friend Mr. Khanin Kumar
Chowdhury. I thank him for his fine effort.

I would also like to thank Mrs. Anima Borkataki of the
Computer Centre of Gauhati University for her help with the
computation work of the regression analysis incorporated in
chapter nine of this thesis.

Finally, I must acknowledge my gratitude to my family
members and departmental colleagues for their constant
encouragement throughout the course of the study.

Madhurjya Prasad Bezbaruah.
