ACKNOWLEDGEMENT

I wish to express my deep sense of gratitude to my supervisor, Dr. Sudhansu kumar Ghosal, Ph.D. (McGill), Reader in Zoology of this University, for his constant guidance and invaluable advice during the whole period of work.

I am beholden to Professor D.K. Choudhuri, Ph.D. (Lond.), D.Sc.(Cal.), Head of the Department of Zoology, for kindly permitting me to work in his department and also for providing the laboratory facilities.

I am grateful to Emeriths Professor R.W. Pickford (University of Glasgow, Glasgow) and Prof. B.K. Follett (University College of North Wales, Bangor), for most valuable discussion which I had with them as they visited India.

I am indebted to Dr. P. Bhanja, Reader in Botany, Burdwan University, for his help in taking photomicrographs.

I am grateful to Prof. G. Majumdar, Dr. J.N. Medda and Dr. S. Ray (Reader in Zoology, Burdwan University) for
their kind help.

Thanks are due to the laboratory colleagues, namely Messrs T.K. Bandyopadhyay, D. Ray, T. Midya, Mrs. S. Bandyopadhyay, Mrs. T. Bandyopadhyay and to all others who generously helped me.

This work was mainly supported by a University Junior Fellowship and by a CSIR Senior Fellowship to me and partly by a CSIR 38(164)/74-GAU-II and a UGC F.23-348/75(SR.II) grants to Dr. Ghosal.

Sumita Joardar (Nee Chatterjee)
