ACKNOWLEDGEMENTS

The author expresses his deep sense of gratitude to Dr. S.K. Ghosal, Ph.D. (McGill), Reader in Zoology, Burdwan University, for his invaluable advice, constant guidance, encouragement and help during the whole period of the research work.

I am indebted to Prof. D.K. Choudhuri, Ph.D. (Lond.), D.Sc. (Cal.), Head, Department of Zoology, Burdwan University for his kind permission to use the laboratory and library facilities of his department.

Sincere thanks are also due to all the teachers of the department for their advice and kind help during the period of my research work.

The author is thankful to Dr. R.W. Pickford, Emeritus Professor, University of Glasgow and Dr. B.B. Mukherjee, Professor of Genetics, McGill University for their unreserved help without which this dissertation would have never been completed.

I am also grateful to my colleagues Dr. T. Bandyopadhy and Dr. S. Joardar, Mrs. T. Bandyopadhyay, Mrs. S. Banerjee and Mr. D. Ray for their co-operation in my research work.

This work is mainly funded by a Junior Research Fellowship of C.S.I.R. to me (Grant No. 7/25(55)/76-EMR-1) and partly by a UGC F.23-348/75(SR.II) grant to Dr. Ghosal.
