Finally PART VI (SUMMARY AND CONCLUSION) comprises only one Chapter. Chapter 19 attempts to sum up the details of the study area in general, terrain use, terrain planning, findings and suggestions.

Illustrations have been selected for their direct and clear impact. Many new line-drawings and graphs have also been structured to this end. Tables have been reduced to the fewest possible number, photographs have been carefully selected to illustrate precisely the subjects under discussion. At the close of each PART, references have been mentioned and a classified bibliography has been placed at the end of the discussion. Appendices follow the bibliography, which but present a detailed form of data, placed in the text during discussion. Lists of abbreviations and glossary used in the references and texts have been included for clarification and understanding.

The study is new for several reasons and, in its humble way, is a contribution to the field of applied geomorphology. It is based on a detailed field study and intimate personal knowledge of the area. To what extent has the present work succeeded is a subject to be judged by the readers.

BURDWAN-713104

Bijay Kumar Patnaik
(Bijay Kumar Patnaik)
The author expresses his deep sense of gratitude to his most revered supervisor Dr. Nageshwar Prasad, Reader, Department of Geography, Burdwan University, Burdwan (West Bengal) for his timely encouragement and scholarly supervision to complete the present work. Dr. Prasad, both as a teacher and the supervisor, has displayed his ailing interest in this research work showing himself at the peak of his carrier, still young in age and well-rooted in research experience. He has guided the work at every stage in spite of his prolonged illness, has taken great pains in examining and checking the entire work from the compilation of available and worked-out institutional, field and laboratory informations to the pre-Ph.D. seminar preparations and presentations, and finally to the summing up of this thesis. Therefore the author, once again, very personally acknowledges the selfless contributions made to this work by Dr. Prasad.

The author owes deep gratitude to his esteemed teachers, Dr. B.N. Sinha, formerly Professor & Head, Department of Geography, Utkal University, Bhubaneswar (Orissa), Professor D.K. Singh and Professor S.N. Tripathy, Department of Geography, Utkal University, Bhubaneswar for providing general informations in regard to the geography of the Chhatrapur Subdivision.

In a personal manner the author would like to place on record his deep sense of gratitude to Professor P.K. Sen, Professor N.K. De, Professor Champa Mitra, Dr. A. Biswas and Ms. M. Basu, Department of Geography, Burdwan University, Burdwan, for enriching his critical thought through their critical appreciation and thought-provoking enquiry during the pre-Ph.D. seminar presentations of the present problem under research.

Deepest thanks are due to Dr. K. Bhattacharya, Ms. S. Barua, Sri R. Basu, Dr. D. Ghosh Dey, Dr. K. Lahiri and Dr. S. Bhaduri for their constructive criticism and interest with regard to the present work.
The author is indeed greatly indebted to Professor S.P. Das Gupta, formerly Director, NATMO, Calcutta, Professor B.C. Patro, Department of Earth Science, Sambalpur University, Sambalpur (Orissa) and Professor S. Panda, Professor & Head, Department of Geology, Khallikote College (Berhampur University), Berhampur, Ganjam (Orissa) for their undiluted and constructive suggestions in course of the present task under research investigation.

The author expresses his deep gratitude to Dr. A. Mahato, Head of the Department of Geography, Marwari College (Ranchi University), Ranchi and Dr. K. Prasad, Reader, Department of Geography, B.S.K. College, Maithon for their positive suggestions with regard to the perfectness of illustrations in the present work.

Indebtedness is due to Prof. Somnath Roy, History Department, Burdwan University, Dr. A. K. Singh, Human Ecologist, Anthropological Survey of India, Calcutta and N. H. Khadse, Research Officer, National Atlas and Thematic Mapping Organization, Calcutta for their constant inspiration to complete the thesis in time.

In a personal manner the author would like to place on record his deep sense of gratitude to all the students, friends and more particularly the learned and active researchers including Sri M. M. Giri, Ms. Sukla Burman, Sri N. C. Modak, Ms. M. Basu and Sri P. Mukherjee, Department of Geography, Burdwan University, Burdwan, for constant academic rapport, and exchange of geomorphic ideas and approaches with regard to their application in the field of agricultural landuse.

Indebtedness is also due to all other members of the Department of Geography, Burdwan University, Burdwan for their kind words, affection and constant inspiration to complete the work quickly.

In a general manner the author is extremely grateful to Sri R. C. Patnaik, Asst. Director, Computer Wing, Food & Civil Supplies Department, Government of Orissa, Bhubaneswar; Sri R. K. Patnaik, Asst. Director (Statistics), Health & Family
Acknowledgement

Welfare Department, Govt. of Orissa, Sambalpur; the Settlement Officers, Tahasildars, Block Development Officers, Agricultural Extension Officers, Soil Conservation Officers, Town Planning Officers, Statistical Officers, Census Research Officers, Geologists, Geo-chemists and Soil Chemists in charge of the Development of the Chhatrapur Subdivision who helped the author by providing details of their work.

The author owes deep gratitude to his friends and colleagues of the P.G. Teaching Department of Geography, G.M. Autonomous College, Sambalpur who helped him from time to time in more than one way.

The author thanks here most sincerely the farmers of the Chhatrapur Subdivision from whom he probably learned more than from anybody else.

Indebtedness is due to the author's most beloved father late Satyanarayan Patnaik and loving mother Smt. Lolita Patnaik who always inspired and blessed the author to complete the work sincerely in the larger interest of his native area, i.e. the Chhatrapur Subdivision.

The author is thankful and grateful to his respected madam Smt. S.P. Arya and her family members who always inspired him to complete the work by often accommodating him as a family member during the author's long stay at Burdwan.

It would be highly ungrateful for the author if he does not extend his indebtedness to grace his wife Smt. Shobha (Raju) and their children Sweta and Swati who always encouraged him to complete the work in time.

Sri Asit Baran Sinha Roy, Burdwan University, Rajbati, Burdwan deserves sincere thanks for preparing the neat type-scripts meticulously.
