

ACKNOWLEDGEMENT

My heartfelt thanks are due to Prof. S. K. Siddhanta, the Head of the Department of Chemistry, University of Burdwan for extending all types of facilities, constant encouragement and guidance during the period in which the works presented in the dissertation were completed. I am also obliged to the Council of Scientific and Industrial Research, Government of India for the award of a fellowship to start the work and to the authorities of the Vivekananda Mahavidyalaya for providing the facilities to complete it. Affectionate services of Dr. A. J. Bhattacharyya of the University of Burdwan and Dr. A. K. Sarkar of the National Physical Laboratory, New Delhi are also gratefully acknowledged. I desire to record my sincere appreciation for the constant help and co-operation of my colleagues, especially Dr. M. Mazumdar and Dr. S. Thakur, during the tenure of my work.

Finally, with the great pleasure, I wish to express my indebtedness to Dr. J. Das, for introducing me to and guiding me through the fascinating field of 'Analytical Chemistry'.
