

ACKNOWLEDGEMENTS

I owe my gratitude and express my heartfelt appreciations to Dr T.C. Banerjee for suggesting this topic of research and for his supervising this work, continuous encouragement, unqualified endurance and innovative expertise during the entire course of this investigation. Materials, particularly on bioenergetics and energy balance of this herbivore, reflect the strong influence his ideas have had on my own thinking.

I am extremely grateful to Dr G. Wilson Fernandes, Universidade Federal de Minas Gerais, Brazil for many useful comments and advices on the draft, and Dr J.D. Holloway, International Institute of Entomology, London, U.K. for identifying the specimens with specific characters and literature.

I am also grateful to several eminent personalities from different academia, especially to Prof. Frank Slansky Jr., University of Florida, USA, Prof. P.C. Bhattacharyya, Gauhati University, Assam, Dr C.M. Lessells, Natherland Institute of Ecology, Natherland, Prof. J.M. Thibaud, Laboratoire d'Entomologie, Paris, Dr L. Szabo, Ecological Institute of L. Kossuth University, Hungary, Prof. J.M. Betsch, Museum national d'Histoire naturelle, Brunoy, France, Prof., T.N. Ananthakrishnan and Dr A. Raman, Entomology Research Institute, Loyola College, Madras, Prof. T.J. Pandian and Dr J. Muthukrishnan, Madurai

Kamraj University, Madurai, Drs B.K. Senapati, Sambalpur University, Orissa, A. Mukherjee North Bengal University, West Bengal, Prof. P.K. Sen Sarma, Ex-Director, Forest Research Institute, Dehradun, and several unknown referees for comments and helpful suggestions offered in the course of discussion, communication and publication of articles in various journals.

I am thankful to the Dean, Faculty of Science, Burdwan University, Burdwan; the Head, Department of Zoology, Burdwan University, Burdwan for all-round help and working facilities; the Head, Department of Botany, Burdwan University, Burdwan for permission to install and run the light traps in the Crop Research Farm (CRF); the Joint Director and Sri T.S. Ganguly, State Agricultural Farm, Burdwan for permission and assistance in collecting the meteorological data and Md. Aslam of this laboratory for routine light trap collections and assistance in the laboratory and field works.

Sincere appreciation and thanks are due to the former and present researchers of this laboratory, Drs. A.S. Mondal, S. Nazimuddin, N. Haque, A.K. Mahapatra (now deceased), T.K. Nayek and Mr G. Tohiuddin, whose enthusiasm and abilities have helped me to analyse and write up the data. I am also thankful to Mr Anil kumar Gupta of this Department for photographs and the Headmaster, K.N. College School, Berhampore, Murshidabad for his kind cooperation to finalise and write up the data for this dissertation in its present form.

I am also thankful to Mr S.N. Aich of this University for taking the pains to typing this dissertation.

A steady financial support, in the form of a junior and a senior research fellowships from the University (No. FC(Sc)/RS/Zoo-3/87), is gratefully acknowledged.

At the long last, I must owe my gratitude to my parents, who have educated me with their untiring care and affection, and encouraged me to complete this work.
