# CONTENTS

## Chapter I: INTRODUCTION

1.1 Introduction .......................... 1  
1.2 Variability of troposphere over India ...... 4  
1.3 Radioclimatology ........................ 5  
1.4 Microwave propagation: clear air effects .... 6  
1.5 Microwave propagation: precipitation effects ... 7  
1.6 Objective of the study ........................ 9  

## Chapter II: TROPOSPHERIC PROPAGATION

2.1 Introduction ................................ 12  
2.2 Gaseous absorption .......................... 14  
2.3 Attenuation due to hydrometeors .......... 15  
2.4 Radio refractivity ............................ 16  
2.5 Tropospheric refractivity models ............ 17  
2.6 Classification of refractivity gradients .... 19  
2.7 Variability of refractivity gradients ....... 21  
2.8 Tropospheric propagation mechanisms ...... 21  
2.9 Rain attenuation ............................. 28  
2.10 Monitoring the troposphere ............... 30  

## Chapter III: RADIOCLIMATOLOGY OVER SOUTH WEST COAST OF INDIAN SUBCONTINENT

3.1 Introduction ................................ 32  
3.2 Earlier work on radioclimatology .......... 32  
3.3 Data base .................................. 35  
3.4 Surface refractivity .......................... 36
| 3.5 | Refractivity profiles | 38 |
| 3.6 | Vertical refractivity gradients | 41 |
| 3.7 | Effective earth's radius factor | 45 |
| 3.8 | Occurrence percentage of super refraction | 49 |
| 3.9 | Tropospheric surface ducting phenomena | 51 |
| 3.10 | Correlation between surface refractivity and refractivity gradients | 53 |
| 3.11 | Discussion | 54 |

**Chapter IV: MICROWAVE PROPAGATION CHARACTERIZATION IN THE COASTAL AND INLAND ZONE IN TROPICAL INDIA**

| 4.1 | Introduction | 57 |
| 4.2 | Objective | 57 |
| 4.3 | Previous investigations | 58 |
| 4.4 | Terrain characteristics | 59 |
| 4.5 | Data base | 60 |
| 4.6 | Propagation characteristics of a microwave link situated in inland zone | 62 |
| 4.7 | Correlation of propagation characteristics with meteorological parameters | 77 |
| 4.8 | Performance of protection methods for line-of-sight microwave links | 79 |
| 4.9 | Microwave propagation characteristics over coastal zone | 85 |
| 4.10 | Determination of geoclimatic factor from microwave link data | 88 |
| 4.11 | Path inclination effect | 89 |
| 4.12 | Discussion | 93 |
Chapter V: RAIN RATE AND RAIN ATTENUATION STATISTICS AT 11 GHz

5.1 Introduction 96
5.2 Objective of the study 98
5.3 Previous work 98
5.4 Terrain profile and system characteristics 100
5.5 Data base 101
5.6 Rain attenuation 102
5.7 Rainfall data 103
5.8 Rain rate and rain attenuation 104
5.9 Comparison of rain rate with CCIR data 105
5.10 Reduction coefficient for Puducherry-Madras link 105
5.11 Prediction of attenuation from Point rain rate measurements 109
5.12 Relation of rain intensities obtained with different integration times 110
5.13 Rainrate measurements over coastal region of Tamil Nadu state 111
5.14 Discussion 113

Chapter VI: SUMMARY AND CONCLUSIONS

6.1 Summary and conclusions 115
6.2 Limitations of the study 118
6.3 Future plans 118
