CHAPTER - VI

SUGGESTIONS FOR FURTHER RESEARCH IN THIS PARTICULAR AREA
CHAPTER-VI

SUGGESTIONS FOR FURTHER RESEARCH IN THIS PARTICULAR AREA.

After conducting the research and analysing the data, the investigator felt that there is a lot of scope for other researchers in the field of technical education. Thus a few suggestions have been made for further researches.

1) Study can be made on the multiple use of infrastructural facilities in the technical institutions of Assam.

2) Study can be made on the deficiencies and obsolences in system of technical education in Assam.

3) Study can also be made on the need of guidance and counselling services particularly for women in technical education.

4) Study can be conducted on the benefits of Multi-Point Entry and Credit system in the technical institutions of Assam.

5) Research can be done on the employment prospects of women pass-outs from Polytechnics and other technical institutions.

6) Study can be made on the continuing education programmes for working technicians in the State including refresher courses.

7) Study can be conducted on the role of Research and Development activities to motivate trainees to self-employment.

8) Research may be done to find out ways and means to make technical education autonomous in curriculum, finance and management.

9) Study can also be conducted on production-cum-training in the idle period of the technical institutions - its scope in resource generation.
10) Research may be conducted on how the consultancy services by technical institutes provide know-how and do-how in the field of production in large as well as small industries including cottage industry.

11) Study can be made on the impact of engineering education on the socio-economic growth of the State.

12) Study can be made on ways and means to improve the academic climate in the technical institutions of Assam.
