Acknowledgement

I wish to express my sincere gratitude to every one who, in their own ways, have helped and contributed to the necessary efforts and supported me in all forms, to complete this thesis.

I express my deep sense of gratitude to Dr. (Mrs) Rita Mahanta, Selection Grade Lecturer, Zoology Department, Cotton College Guwahati, teacher and above all her motherly affection, for her painstaking guidance, enthusiastic supervision and inspiring criticism throughout the entire period of the study. I shall remain grateful for introducing me to the interesting and promising field of Free Radical Biochemistry.

My heartfelt gratitude goes to Professor S.K. Bhattacharjee, Department of Chemistry, Gauhati University, for his extraordinary guidance, generosity in sharing knowledge and ideas, inspiring discussions, enthusiasm and support throughout the entire period of study.

Dr. Sandip K. Bandyopadhyay, Dept. of Biochemistry, IPGME&R, Kolkata, West Bengal, for believing in me and opening my eyes for clinical research, for generously sharing ideas and thoughts, for extending his continuous guidance and never-ending support in all kinds of situations. I never met anyone his capacity, enthusiasm for research and sharp intellect. His sharing unique ability and boundless experiences have enriched this work. I truly owe a lot of my learning in research to him. I aspire to become an efficient disciple to propagate the knowledge I acquired from him.

I shall be ever obliged to Dr. R.K. Mahanta M.D., Prof., Biochemistry, Gauhati Medical College, who has done a tremendous work for the improvement of methodology and the direction of work. I am grateful for his vast knowledge in the research fields of free radicals and cardiovascular chemistry and practical experiences in clinical study readily available suggestions and encouragement at crucial hours were of immense help during the entire course of this study.

I express my deep sense of gratitude to Professor K.L. Mukherjee, renowned clinical biochemists of India for his immense help and guidance.

I also take the opportunity of thanking to Dr. Kishan Pradhan, Hony. Secretary, Calcutta Heart Clinic & Hospital, Block – HC, Sector – III, Salt Lake, Kolkata –
700106, for granting me permission to utilize facilities available in his institute and kindly offering helpful comments at different stages of my work. I also take the opportunity of thanking to Dr. Asoke Samanta, Medical Director, and Mr. Dipankar Sinha, Co-ordinator, for giving me fruitful advice at the beginning of study and for showing interest in my work. I thank Dr. (Mrs) Sumita Ghatak, Head, Department of clinical biochemistry, for always encouraging the progress in the clinical works.

I convey my special thanks to Prof. Gouri Sankar Ghatak, Scientist, Geology Department, Presidency College, Kolkata for his help and cooperation from the first day of my research.

Professor Sasanka Chakraborty, Professor and Head, Department of Biochemistry, IPGME&R, Kolkata, for sharing his vast knowledge in biochemistry, for good ideas, constructive criticism and for always being kind and helpful. Professor Basudev Bhattacherjee, Professor, for his great help and support.

Angshuman Biswas, my colleague and intimate friend, for always shared with his creativity, knowledge and ideas and for all support, encouragement and discussions just about everything, research-related or not.

Mr. N.K. Pramanik, Retired Public Analyst, Govt of West Bengal, who is with me at all times since my master degree till now, without his immense help and guidance it is not possible to reach here.

Dr. (Mrs) Siuli Adak (Roy), for excellent and instant delivered of remarks to my somewhat unstructured manuscripts.

Dr. Krishnajyoti Goswami, President, ACBI, for his encouragement, help and cooperation from the first day of my research work.

Susanta Mistri and Manas Mukherjee, Department of Clinical Biochemistry, Calcutta Heart Clinic & Hospital, Kolkata, my colleagues and performing the analyses of biochemical markers. Purnima Santra, Samir Das, Prabir Das, Souvik Chawdhury, Argha Chakraborty and Madhu Sudan Dolai, from the same department, for their pleasant collaboration during the blood collection and questionnaire. Jayanta Jana, Cardiology department for spending a number of days interpreting thousands of ECGs.
All the local investigators, research nurses and staff in the hospitals participating in the study, especially those assisting in the handling of the ECGs and blood samples. *Tania, Bindu, Sirshendu, Sujata, Soma, Prasun, Anindya, Biplab and Arnab*, my colleagues in our research group, for friendship, collaboration, help, technical assistance, discussions and for providing an open and friendly atmosphere in which it has been a pleasure to work;

All of my colleagues at Gauhati University Chemistry LAB, for making it possible to work in such a nice place.

*Jayanta Da (Ghosh)*, for helping me getting started when I first came to the lab, for valuable discussions and friendship.

*Dr. Somen Sahu*, Senior Lecturer, Department of Fishery Economics and Statistics, WBUAFS, India, for sharing his vast knowledge in epidemiology and biostatics, for teaching me so patiently, with his great pedagogic skills.

*Dr. Mridul Batthakur*, for his excellent technical assistance. Without his never-ending enthusiasm and invaluable help this work would never been done. Thank you so very much.

*Swati Sen*, for her love, support, encouragement and patience - I wouldn't have made without her cooperation.

My cousin brother *Rajesh*, is constantly in touch with me arranging the voluminous manuscript with all his earnestness to reveal the final shape of the thesis.

My sincere regards to my parents for constant care and support in daily life, in my education, research, and their affection made life even more exciting and progressive, my brother with families for support and love, and my sister, for always supporting me in my education.
